Color

Technologies

EVA

EVA stands for "ethylene vinyl acetate". It is a "rubbery" material by its properties; it is flexible and soft. It is a material with a light weight, which will allow the safety shoe to be light.

100% Metal free

No metal is present

Extreme waterproof

Waterproof ++

Composite safety toecap

Meets all requirements described under EN ISO 20345 and is also:

- Light compared to the standard steel toecap
- Temperature

Antistatic

The use of antistatic safety shoes prevents static electricity overload in the human body, by sending these charges to the ground, in order to avoid a sudden electric discharge between electrically

Chemical resistant

The shoes have a resistance to chemical products.

- regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

charged objects, following a contact.

Oil resistant

The shoes have a resistance to oil products
