# MISSION STATEMENT

**HEROCK® PROVIDES THE  
FASTEST OUT OF STOCK  
DELIVERY OF PREMIUM  
FASHIONABLE WORKWEAR.  
WHEREVER. WHENEVER.**

**OUR PRODUCTS ARE THE RESULT  
OF YEARS OF EXPERIENCE IN THE  
FIELD AND A CONSTANT SEARCH  
FOR IMPROVEMENT.**

**ALL OF OUR PRODUCTS HAVE  
UNDERGONE EXTENSIVE TESTING  
BEFORE THEY ARE GIVEN  
A PLACE IN OUR CATALOGUE.**

**THE TESTS ARE NOT ONLY  
CONDUCTED BY THE SCIENTISTS  
AND RESEARCHERS IN OUR  
LABORATORIES, BUT ALSO BY AN  
ENTIRE TEAM OF EXPERTS WHO  
INDIVIDUALLY TEST EVERY ITEM IN  
THE MOST DEMANDING CONDITIONS.**

**ALL THE TESTING ALLOW US TO  
GUARANTEE NOT ONLY THE  
OUTSTANDING TECHNICAL QUALITY  
OF OUR CLOTHING BUT ALSO THEIR  
SUPERIOR SUITABILITY FOR USE ON  
THE JOB.**

# FROM HANDYMAN TO PROFESSIONAL

**OUR COLLECTION CAN BE DIVIDED IN THREE DIFFERENT CATEGORIES. EACH OF WHICH IS SPECIFICALLY DESIGNED TO SATISFY THE UNIQUE NEEDS AND DEMANDS OF THEIR TARGET AUDIENCE.**

## ESSENTIALS

This collection holds the basic needs for everybody who's eager to go to work: whether you're a professional doing your daily job or just a motivated handyman with a passion for home improvement, every search for the right tools begins here. The articles in this collection only carry the HEROCK® logo on the inside, which makes them perfect for adding extra prints or embroideries. Ideal if you've got a business to advertise!

## ESSENTIALS

## ADDITIONALS

Are you looking for an item that is designed for a specific job or needs to meet a particular demand? You will find it in the Additional collection. This collection is primarily aimed at professionals, but also the advanced handy-man will find here what he or she is looking for. The products in this line are perfect for personalisation with your company logo or a specific design.

## ADDITIONALS

## EXPERTS

This collection is the absolute apex of the HEROCK® arsenal: the items are specifically developed for professionals who need the absolute best. This collection contains our most exclusive items and our most enduring fabrics. The Expert collection is developed for any craftsman who would like to make the best impression on his customers.

## EXPERTS

# ERGONOMICS

---

The first function for every item is to protect its wearer against external factors and physical injuries. HEROCK® does not just design its collections to make you look good while you are at work, We already explained the protection against external conditions in the three layer system. However, protecting yourself against physical strain on your body by wearing the right clothes is equally important.

Carrying around heavy toolboxes, building materials and other equipment can start to weigh heavily on your physical frame. That is why our designers work hard on fortifying the crucial points in our clothing and taking a lot of pressure away from your muscles and joints. This is partly achieved by spreading out the weight of your tools and other instruments, ensuring that no part of the body is overburdened. Our designs also ensure

that you don't have to make any unnatural movements to access your equipment. We use techniques and tissues from the sport industry to make our workwear as ergonomic as possible. After all, the efforts of a craftsman are often more intense than those of real sportsmen!

# DESIGN

---

We always go the extra mile. In order to provide our customers with the best service and perfect workwear, our research and development team never leaves anything to chance. We closely monitor every step of the production, from initial design to manufacturing and so see that every product meets our high standards and those of our customers. We allow NO flaws, period. HEROCK® continuously invests in product-improvement, based on the needs of the working hero. We always work with high-end brands and qualities such as Cordura®, YKK®, Wasa®, Pro-reforce, Coolmax®, Thermolite®, DuPont®, Sorona® Flex 2000, Flexfit® and Meryl® Skinlife.

# ENVIRONMENT ETHICS

For HEROCK®, a heart for the environment and social engagement is not an added value but a standard that every one of our items has to meet. That's why we always make sure that all of our production processes are carried out as cleanly and ethically as possible. We do this by making a conscious choice when it comes to issues like suppliers, resources and the factories where our clothes are assembled. So if you choose to purchase an item from our collections, you can get your hands dirty with a clear conscience. HEROCK® dedicates itself to providing quality at a good price without becoming involved in things like child labour or unsuitable working conditions. That is why we keep a close eye on all production processes, with quality control teams visiting every one of our factories to ensure that all standards are met. Naturally, all of our items are produced in compliance with European directives.

## ENVIRONMENT AND ECOLOGY

HEROCK® focuses on sustainability in every step of the production chain – from design to transport. We pro-actively adapt our company policy to minimize our ecological footprint. This is an on-going process. We keep a close watch on new developments and opportunities, thus providing our clients with qualitative and durable workwear with long-lasting functions and keeping our production as environmentally friendly as possible.

## SOME OF OUR ENGAGEMENTS

- Solar panels provide our headquarters and warehouse with energy.
- We ask our partners to pay attention to durability, when it comes to waste and waste management.
- Our production partners have agreed not to use toxic substances and have signed the REACH charter: Registration, Evaluation, Authorisation of Chemical substances. It is an EU order that wishes to protect people from harmful chemical products; moreover this order wishes to promote alternative methods with regard to hazard assessment and to minimize animal testing.
- We closely see to the packaging of our products: all our transport-boxes are made of recycled cardboard, with a 'Reduce, reuse, recycle'-tag. Our hangtags are made of recycled paper, and we pack our articles in (partly) recycled plastic. We are looking for ways to use biodegradable plastics.
- All brand labels (except for some) are made of recycled materials and can be recycled as well.
- We provide our retail centres/shops with recyclable paper bags.
- We organise our transport in such a way that we bundle orders; this leads to less containers and less air, water, and road transport.

# 2 YEAR GUARANTEE

**HEROCK® PROVIDES THE BEST POSSIBLE SERVICE TO ITS CLIENTS. IT MEANS THAT WE DO EVERYTHING TO MAKE OUR CLOTHING AS DURABLE AND RESISTENT AS POSSIBLE. OF COURSE WE DO REALIZE THAT THERE WILL ALWAYS BE AN INEVITABLE AMOUNT OF WEAR AND TEAR IN A PROFESSIONAL WORKING ENVIRONMENT. HEROCK® MEETS THE HIGHEST DEMANDS IN QUALITY, WE'RE ABLE TO PROVIDE A WARRANTY ON ANY PRODUCTION ERRORS THAT MIGHT OCCUR.**

**REGISTER ON:  
[HEROCKWORKWEAR.COM/GUARANTEE](https://www.herockworkwear.com/guarantee)**

# HELIX

## THE TIME WHEN CONSTRUCTION WORKERS AND MASONS WERE EXCLUSIVELY MEN HAS PAST FOR QUITE A WHILE

HEROCK® is all about equality. That is why our entire collection is made for both men and women. We align every garment to the needs and wishes of a large group of working heroes, no matter what gender. You'll always find what you are looking for in the broad HEROCK® collection – workwear or accessory: a comfortable, durable and wear resistant pair of work trousers, wind resistant jackets, hats ... and, should you require a complete team wear fit – in many colours and sizes - HEROCK® will cater to your demand.

# 3-LAYER SYSTEM

**A CORRECT APPLICATION OF THIS 3-LAYER SYSTEM IS A GUARANTEE FOR AN OPTIMAL PERFORMANCE AND ALLOWS YOU TO WORK AS FREELY AND COMFORTABLY AS POSSIBLE.**

An optimal protection against varying weather conditions is created by combining the right items and fabrics. They do however have to complement each other in the right way, don't just randomly throw them together. The right combination of fabrics will allow you to continue working without being bothered by the weather or your own body heat and transpiration.

## **BOTTOM LAYER**

The bottom layer of your clothing has to ensure that your body heat and transpiration moisture find their way to the outside as quickly as possible. Wearing the right type of bottom layer prevents you from cooling down too quickly when you decide to take a break.

## **MIDDLE LAYER**

This layer keeps you dry and warm at the same time by passing on your transpiration moisture from the bottom layer to the top layer while keeping out the cold. Fleece, for example, is an ideal fabric for this layer because it passes on moisture while insulating your body against low temperatures.

## **TOP LAYER**

The main goal of the outer layer is to protect its wearer against all external conditions. Snow, rain or hail, your top layer has to keep it all out while passing on your own body heat and transpiration moisture to the outside. The ideal fabric for an outer layer is not only breathable, but also wind and waterproof.

# NORM EN ISO 20345

## #SAFETYSHOES

**Safety norm for safety footwear for professional use** — The regulations to which safety footwear needs to comply have been determined in the European Safety Standards (safety norm EN ISO 20345). All shoes that fall under these norms, need to be equipped with – at least – some basic requirements. The mark ‘S’ stands for ‘safety’. All our safety footwear protects against toecap impact up to an energy level of 200J and against sole penetration. All used components are tested and selected according to the European technical requirements with regards to safety, ergonomics, comfort and quality.

Please always check whether the product complies with your work’s safety requirements.  
Read the manual thoroughly before first use. This manual comes with every pair of shoes.

## 1. BASIC FUNDAMENTAL REQUIREMENTS

## 2. ADDITIONAL REQUIREMENTS

**A** Antistatic features

**P** Anti perforation sole

**E** Energy absorption in the heel

**FO** Sole has resistance to hydrocarbons

**WR** Whole footwear is resistant to water penetration and absorption

**WRU** Only upper material is resistant to water penetration and absorption

Closed heel

Cleated outsole

### 3. STANDARD LABELS

**S1**

**SB**

+

Safety footwear should always comply with the EN ISO 20345 safety requirements.

**Obligatory characteristics:**

Work shoes with S1 certification have a reinforced safety toe made of steel or composite, a closed heel and anti-static sole with hydrocarbon resistance. With an energy absorbent heel, you can work comfortably on every job.

**S1P**

**S1**

+

Safety shoes of the S1P type do not have their own safety class, but because they are used so frequently, they get a separate mention here. These safety shoes are all based on the S1 safety class with an anti-perforation sole as additional feature.

**S1P safety shoes have the following features:**

- All basic features for safety shoes
- All extra features in safety class S1
- The extra feature P

**S2**

**S1**

+

Safety shoes of the S2 type have the same features as the shoes in safety class S1 with the addition of an extra quality: resistance of the upper material against penetration and absorption of water.

**S2 shoes have the following features:**

- All basic features for safety shoes
- All extra features in safety class S1
- The extra feature WRU

**S3**

**S2**

+

**S3 shoes have the following features:**

- All basic features for safety shoes
- All extra features in safety class S2
- The extra feature P
- Cleated outsole

**S5**

**S3**

+

S5 Safety Footwear offers all-round protection of the highest safety level. The plastic or rubber boots offer the same features as the safety shoes in S3 and are additionally fully waterproof

### 4. SLIP RESISTANCE

**SRA** Tested on ceramic tile floor wetted with a diluted soap solution

+

**SRB** Tested on steel floor with glycerol

=

**SRC** Tested under both SRA and SRB conditions

# TIPS FOR FINDING THE RIGHT SHOE

Always take the time when trying on your shoes. When trying them on, make certain that you can move your toes freely without having your foot fit too loosely in the shoe. Take into account that your feet tend to swell up slightly during the course of the day, so it is best to try on new shoes during the afternoon. Keep in mind in which conditions your shoes will be used for and what kind of work you will be primarily doing. Not every job requires the same footwear.

## HOW MANY TYPES OF SAFETY SHOES ARE THERE?

	WHEN	ADVANTAGE	DISADVANTAGE
<b>Safety shoes low model (leather)</b> →	Fit for people who have to kneel regularly	The foot can easily be moved inside the shoe	Achilles tendon is less protected
<b>Safety shoes high model (leather)</b> →	Fit for heavy duty work	Sufficient support and protection for the achilles tendon	Foot is less easily moved inside the shoe
<b>Safety boots (leather)</b> →	Fit for wet or humid environments	Lining is possible = fit for cold environments	Requires maintenance
<b>Safety boots (synthetic fabric)</b> →	Fit for wet environments and for working with chemicals*	Cheap and require low maintenance	Less isolating against cold – sensitive to heat

\*Chemicals can penetrate leather

## ATTENTION POINTS WHEN PURCHASING YOUR SHOES

In this diagram, you can see which type of foot protection fits best for a specific work environment.

TYPE	WORK ENVIRONMENT				
<b>Safety shoes low model (leather)</b> →					
<b>Safety shoes high model (leather)</b> →					
<b>Safety boots (leather)</b> →					
<b>Safety boots (synthetic fabric)</b> →					
	KNEELING DOWN	CLIMBING	WET ENVIRONMENT	WELDING AND SOLDERING	WORKING WITH CHEMICALS

## TIPS FOR TESTING YOUR FOOTWEAR

- Choose your shoe according to the job you need it for
- When trying on new shoes, your feet have to be able to move freely and your shoe has to fit the shape of your foot. Make sure that you can place one finger behind your foot when you move your foot all the way forward
- Take your time when picking out the right shoes and remember to try them on in the afternoon since your feet swell up during the day

# TOECAPS & MIDSOLES

## SAFETY FOOTWEAR LIMITATIONS

In case one of the safety symbols are not indicated, the shoe will not cover these risks. All materials are prone to aging, even with the highest quality materials. Do not stock shoes longer than two years. Unfavourable stock conditions may have a bad influence on the usage time and quality.

These conditions may influence aging:

- temperature
- humidity
- changes in material composition

## FREQUENCY IN USE, WEAR AND WORKING CONDITIONS DETERMINE THE LIFESPAN

## ANTI- PERFORATION MIDSOLE

## THE ANTI PERFORATION MIDSOLE IS AN IMPENETRABLE MIDSOLE THAT PROTECTS THE FEET AGAINST PENETRATIONS THROUGH THE SOLE OF THE SHOE. OUR USED ANTI PERFORATION MIDSOLES ARE IN ACCORDANCE WITH EN ISO 20345: 2011

For the moment there are two generic types of impenetrable inserts for PBM-shoes. One made of metal material and one made of non-metal material; both types meet the minimum requirements for penetration resistance (standard EN ISO 20345), each with its own characteristics:

- metal insert-soles are less subject to sharp objects/danger (in width, geometrics, sharpness), but they do not cover the whole sole of the shoe due to production limitations
- non-metal insert-soles are lighter and more flexible and cover more of the sole surface. The penetration resistance can be different, depending on the sharp objects/danger (width, geometrics, sharpness). The insert-soles cannot be traced by metal detectors and they provide you with thermal insulation and regulate temperature.

**Check the instruction manual for more details**

## 200 JOULE SAFETY TOECAP

Apart from the different midsoles we distinguish three kinds of safety toecaps. They all comply with the EN ISO 20345 requirements. The most important requirement is energy impact resistance up to 200 J. The biggest difference in the safety toecaps is the weight.

### METAL SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also: more classic and best resistant to direct impact (although this situation is rare)

### COMPOSITE SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also:

- Light compared to the standard steel toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

### CARBON SAFETY TOECAP

meets all requirements described under EN ISO 20345 and is also:

- Ultra-light compared to the standard steel and composite toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

## ANTISTATIC SHOES

Antistatic safety shoes and boots have a low electrical resistance between 0.1 and 1000 MegaOhm (MΩ). The use of anti-static safety footwear helps prevent a build-up of static electrical charges in the human body by sending these charges to the ground, preventing a sudden flow of electricity between electrically charged objects caused by contact. Antistatic safety footwear should not be confused with ESD (Electrostatic Discharge) footwear. Both terms refer to contact resistance but there are fundamental differences between the two! For more information about anti-static safety footwear, please read carefully our user instructions.

## SLIP RESISTANCE

The SR certification on safety footwear tells you how good the grip of the outer sole is. It is tested on different surfaces and with various liquids.

**SRA:** work shoes with SRA certification provide slip resistance on a ceramic tile floor with lauryl sulphate. (SLS), forward slipping of the heel and on an even surface.

**SRB:** safety shoes with SRB certification provide slip resistance on a steel surface with glycerol, forward slipping of the heel and on an even surface.

**SRC:** work shoes with SRC certification combine the slip resistance of SRA and SRB. The safety footwear therefore offers the highest slip resistance.

## CARE INSTRUCTIONS TIPS & TRICKS

- Keep your safety shoes in a dry well-ventilated dark room. We advise to use two pairs of safety shoes, allowing your gear to dry.
- Clean your shoes after use with a brush or a dry cloth. Keep them well ventilated and leave them to dry (insert a piece of newspaper if needed). Do not put your shoes in direct sunlight or close to a heat source. If there is a lot of contact with water, please use a water-resistant product and follow the instructions.
- Please avoid concrete, urine, acids, chemicals... They cause tearing of leather.
- Leather shoes need to be oiled from time to time, certainly after you have dried them, in order to prevent tear. The leather will last longer and will hold its natural elasticity. Your shoes will last longer.
- End of use? Do not throw away your shoes, but donate them or recycle. Think about a second life.

# STANDARDIZATION & CE-CERTIFICATES

## EN ISO 13688

This standard sets requirements for - among other things - safety, design and comfort of protective clothing. It also sets more requirements than the previous standard on the ageing of clothing through use, for example, but also as a result of washing. In particular, if a manufacturer claims that the clothing may be washed it must demonstrate that the protective properties of the clothing remain after the clothing has been washed the claimed number of times.

## EN 343: 2003 + A1: 2007

This European standard relates to protective clothing for rain, wind and cold in temperatures higher than -5 °C. This standard specifies the requirements and testing methods applied to materials and seams of protective clothing with regard to bad weather conditions (for instance: rain or snow, fog and damp)

### IMPERMEABILITY

This factor is fundamental for superior protection. The rainwear's impermeability is determined by the garment's material. In the symbol, impermeability is indicated on the location of the X with a number between 1 and 3, where the number represents the class. Impermeability is measured by the water pressure of a water column with a determined height and a determined diameter. The height of the column determines the class.

CLASS	
1	water column of at least 80 cm height
2	water column of 80 cm to 130 cm height
3	water column of at least 130 cm height

Class 3 is the highest and the best class for impermeability

### WATER VAPOUR RESISTANCE

The classic unit (g/m<sup>2</sup> per 24 hours) was easy to understand. However, the EN 343 uses a value of evaporative resistance (m<sup>2</sup>. Pa/W), which is measured by the so-called 'skin model' (skin test EN11092).

Important information for a better understanding: The higher the RET value, the stronger the vapour resistance of the material; consequently, less vapour passes in case of a high RET value. The laboratory performs this static test at 35°C. Breathable clothing removes perspiration from the skin and the garment. If too much moisture accumulates in the garment, the condensation creates the impression of moist skin. In cold conditions the wearer runs the risk of cooling off quickly; in warm conditions the heart rate increases and there is a possibility of the development of thermal stress. A person feels well when the amount of perspiration produced by the body is equivalent to the amount of perspiration that is eliminated.

CLASS	
1	RET-value higher than 40
2	RET-value between 20 and 40
3	RET-value lower than 20

Class 3 is the highest and best class, more moisture can evaporate.

## EN ISO 15797:2004/AC:2004

Clothing that is certified under ISO 15797 has been tested for its resistance to industrial washing and drying.

The standard specifies the test procedure for measuring the effects of industrial washing on work clothing and on its colour and durability. The clothing is tested using eight different washing procedures that simulate the influences that work clothing is exposed to during industrial washing. The clothing should be tested in a variety of ways. The preservation of the fit, wear-resistance of the seams, strength of the material, colour-fastness in relation to the colour intensity and release of colour must meet the standard.

## EN ISO 20471: 2013

**HIGH VISIBILITY CLOTHING**

This international standard for high-visibility clothing specifies the visibility of the user on the work floor. Everyone who works on streets, roads or building sites must wear clothing that meets the EN ISO 20471:2013 standard so the wearer is visually identifiable. The purpose of this clothing is to increase the visibility of the user both at night and during the day. Therefore, this clothing should not be covered by other outfits or have large logos printed on it that impair the reflective surface and hence the visibility. The clothing may be personalised, but this must be approved beforehand by a registered body.

You can obtain advice from your safety adviser about this. The number next to the pictogram indicates the class to which the clothing belongs, this depends on the minimum surface area of the fluorescent and reflective material:

#### MINIMUM SURFACE WITH VISIBLE MATERIAL M<sup>2</sup>

Class	Background material (m <sup>2</sup> )	Reflective material (m <sup>2</sup> )
1	0,14	0,10
2	0,50	0,13
3	0,80	0,20

The colour coordinates and the luminance factor must be within certain thresholds (before and after lighting). Requirements are also placed on the colourfastness of both the fluorescent colours and the contrasting colours. Furthermore, the clothing should have been tested by washing at least 5 times, unless specified otherwise on the clothing. The working life of the clothing not only depends on the number of times it has been washed, but also on usage, maintenance and correct storage. The clothing must be cared for correctly and it must be cleaned regularly. This is because the protective properties of the clothing are reduced when the clothing is dirty. The accompanying instructions describe how to care for the clothing. You can find the maximum number of times that the clothing can be washed next to the high visibility symbol. However, this only refers to the highvisibility property of the clothing.

#### WHICH CLASS TO USE AND WHEN?

**CLASS 1:** This class can be used in other situations by visitors who are accompanied by people wearing a

higher class of clothing. This clothing should not be used for working on public highways. A higher class must be used here, even for brief visits.

**CLASS 2:** this clothing can be worn during the day, provided that the weather conditions and visibility are good. It is recommended for all types of work, irrespective of the duration of the work.

**CLASS 3:** this clothing can be worn in the same circumstances as class 2. However, it is compulsory where visibility is limited, when work is carried out at night and in poor weather conditions.

#### EN 14058: 2017

EN 14058:2017

#### PROTECTION IN COOL ENVIRONMENTS

EN 14058 specifies requirements and test methods for the performance of garments for protection against the effects of cool environments above -5 °C. Clothing must be worn close to the body and all adaptations must be used (adjustable bottom and cuffs). There are no model specifications but the clothing needs to be adaptable in that way that upper and lower garments overlap, also when bending. Clothing must be stored in a dry place in order to maintain the thermal insulation value. These effects comprise not only low air temperatures, but also humidity and air velocity. Cold protective ensembles are excluded from this standard. The protective effects and requirements of footwear, gloves and separate head wear are excluded from the scope of this standard. The key here is to manage all layers (bottom, middle and top layer) and to make sure the clothing is closed and fits well.

#### EN 14404: 2004 + A 1: 2010

EN 14404:2004  
A 1:2010

This standard describes the test methods and requirements for knee protectors for work in a kneeling position. Our Herock® knee pockets are certified in combination with the Herock® knee protectors 21MI0901 (protection type 2). Please consult the user instructions of your trousers to check the penetration level.

#### There are 4 types of knee protectors

1	'Independent' knee protectors, attached to the leg
2	Protectors designed to put in kneepockets on trousers
3	Loose knee protection
4	Knee protectors that are part of other protection

#### There are 3 penetration levels

0	Knee protectors suitable to be used on a flat surface only, offering no protection against penetration. The other requirements of EN14404 are met
1	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against penetration by objects < 1 cm
3	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against extreme conditions (larger objects & impact)

# WASHING INSTRUCTIONS

All of our clothing has been designed to optimally endure the natural elements and heavy working conditions. But even the best lasting clothes need to be treated right if you want to work in them for a long time. That's why you have to make sure that you follow the washing instructions on our packaging and inside our items closely. You can find the most important washing instructions here.

The label will give you an indication about the maximum of treatment that an item can be subjected to. The numbers give you the highest allowed temperatures in °C. If you use a limited washing program, only load up the machine halfway and make sure that you have a high liquor ratio with decreased washing and whirling motion.

## WASHING

-  Professional wet-cleaning
-  Professional wet-cleaning Gentle process
-  Professional wet-cleaning Very gentle process
-  Do not wet-clean

## TIPS & TRICKS

- There is no need to wash at highest temperature when the clothing is light/ mildly dirty. Washing at lower temperatures is better for your clothing and the environment. Always choose the eco-washing program.
- HEROCK® clothing is – mostly – dryer safe; we recommend however to dry your clothes on an even surface (esp. with chunky knitted articles or line dry). Your clothing will last longer and this method is more environmental friendly.
- Do not iron the prints.
- You don't wear your HEROCK® clothing any longer? Donate or recycle! Don't just throw away your clothing and think about a second life.

# FITTING AND SIZES

Wearing the correct size is not only important for catwalks. Professionals need to wear garments that allow easy movement and provide them with the (working) comfort they need. A garment that does not fit could disturb movements and lead to unsafe situations. An article that does not fit well is more prone to

wear and will have to be replaced quicker. That is why HEROCK® focuses on a perfect fit workwear collection. The pockets and other functions of our clothing are easily reachable and accessible, that may seem a detail, but it can be a big difference in the workplace. A perfect fit is key when it

comes to free and easy movement. We offer each article of our collection in every possible size. Check your measurements on the following pages and choose a size that fits best for you physique and height.

# FABRICS & TREATMENT

**HEROCK® MAKES USE OF THE BEST TECHNOLOGIES THAT ARE AVAILABLE TO US. THAT WAY WE CAN GUARANTEE AN OPTIMAL PROTECTION AND AN UNMATCHED CONVENIENCE WHILE DOING YOUR JOB. HERE YOU WILL FIND MORE DETAILS ON OUR MOST FREQUENTLY USED FABRICS AND TECHNOLOGIES SO YOU KNOW EXACTLY WHAT YOU ARE PURCHASING.**

## **CORDURA®**

Cordura® is a fabric that was designed by textile manufacturer Dupont. This polyamid fiber is extremely durable and strong, but very flexible at the same time. Herock® makes use of this extraordinary fabric to fortify crucial points in its clothing, for example on the knees, shoulders and elbows.

## **COOLMAX®**

The Coolmax® fiber which is incorporated into the fabric, allows you to keep your body dry and cool: the specially designed fiber will pass your transpiration moisture to the layer above where it can evaporate. This fabric is even worn by professional athletes because of its unique ventilating abilities.

## **THERMOLITE®**

The Thermolite® fiber technology delivers lightweight warmth, it traps a layer of warm air between the fabric and your skin. It is engineered to help and optimize your performance without weighing you down.

## **FLEXFIT®**

Our Flexfit® caps are fitted with a patented technology that weaves polyurethane Spandex into the sweatband and throughout the entire crown, providing a superbly comfortable fit.

## **YKK®**

YKK® zippers are designed by the YKK® Fastening Products Group. They are the strongest zippers in the world. We use them to add even more strength to the HEROCK® workwear.

## **meryl®**

The ideal basis layer for the three layer system and perfectly sweat-proof. The quick-dry characteristics allow maximum comfort and keep your body warm.

## **FLEX 2000**

This is an extra strong polyester fabric that is fortified with polyurethane, a PVC-coating and taped seams. This combination makes a 100% waterproof outside, while the inside of your clothing absorbs and passes on transpiration moisture and condensation. In other words: the ideal fabric for a long day of work under the open sky or in the rain.

## **PRO- REFORCE**

Pro-Reforce is an innovative material that was designed to function as a protective shield. The fabric is made out of a 100% Oxford polyester material with an additional coating that does not only make your clothing dirt-repellent, but also provides extra mechanical resistance. This extremely robust and durable fabric will protect you against any possible external factor and allow you to work in all possible conditions, whether you're dealing with extreme weather or working conditions. Some items are completely manufactured using this fabric, others are fortified with Pro-Reforce in crucial points.

## **WASA SWEDEN**

WASA SWEDEN QUALITY specializes in durable accessories. They use a high percentage of copper mixed with zinc, which makes their fasteners more solid, more easily workable and more securely attached in our clothing. As a result, our HEROCK® products become more durable.

## COTTON

This material is one of the cornerstones of our collection: the material works both insulating and ventilating at the same time. In addition, cotton is a strong and enduring fiber that is still soft and comfortable to the touch.

### 100% PRE-SHRUNK COTTON TWILL 300G/M<sup>2</sup> WATER-REPELLENT COATING

This form-retaining variant on traditional cotton works both insulating and ventilating at the same time, which makes it perfect for use at higher temperatures. Moreover, this material will not melt when exposed to high temperatures, making it ideal for welders and technicians.

### 100% COTTON JERSEY PRE-SHRUNK 190G/M<sup>2</sup>

This material is made out of pre-shrunk cotton which is soft, enduring and convenient at the same time. Thanks to its texture, the fabric is perfectly suitable for the adding of a print or embroidery.

### 95% COTTON 5% ELASTANE PRE-SHRUNK JERSEY 200G/M<sup>2</sup>

This fabric is made of pre-shrunk cotton that is soft and comfortable. The addition of elastane makes the fabric elastic.

### 80% COTTON 20% POLYESTER PRE-SHRUNK JERSEY TERRY 270G/M<sup>2</sup>

Fabric made out of pre-shrunk cotton, with a somewhat rougher inside structure and a smooth outside; perfectly printable or for embroidering.

### 100% JEANS

This heavy and strong variant of cotton is a classic because of its extraordinary durability and multifunctionality. Denim is one of the oldest fabrics in our assortment and its place between our other fabrics is rightfully earned.

### POLYESTER/COTTON

These two fibers together form a lightweight and strong fabric: the mix between polyester and cotton results into an optimal combination of durability and comfort. Thanks to its unique composition, this fabric is guaranteed to retain its shape and color, which makes it very suitable for work in demanding conditions.

## 65% POLYESTER

### 35% COTTON TWILL

#### WATER-REPELLENT COATING

The combination of polyester and cotton makes sure that this material is light to wear, but insulating and highly enduring at the same time. Thanks to its foldability and minimal weight, its wearer enjoys both a high freedom of movement and an unmatched comfort. Thanks to its lighter composition, this fabric is suitable to wear throughout the entire year and both colorfast and wearproof.

### 65% POLYESTER 35% COTTON CANVAS WATER-REPELLENT COATING

A rough, all-round polyester/cotton fabric which is soft, enduring and flexible. Fortified to retain its form and excellent comfort. The majority of HEROCK® EXPERTS' collection of functional workwear is available in this fabric.

### 65% POLYESTER 35% COTTON RIPSTOP 210G/M<sup>2</sup>

Sturdy, light and comfortable fabric. The ripstop construction prevents tear through.

### 64% COTTON 34% POLYESTER COOLMAX® 2% ELASTANE 180G/M<sup>2</sup>

Very light and pleasant elastic fabric mainly of cotton. It's a very fresh-feeling fabric with the special Coolmax® technology.

### 63% COTTON 12% POLYAMIDE 11% POLYESTER THERMOLITE 13% POLYESTER COOLMAX® 1% ELASTANE

This unique fabric has been developed for use throughout the entire year. The denim fabric ensures warmth and comfort without extra weight and a fresh feel in the summer. The elasticity of the fabric is very comfortable and ergonomic

### 70% POLYESTER 30% COTTON WITH TWILL 300G/M<sup>2</sup>

Wear-resistant and flexible fabric feeling pleasant on the skin with cotton woven on the inside. Polyester is woven into the outside of the fabric so dirt absorption is reduced.

### 65% POLYESTER 35% COTTON PIQUÉ 210G/M<sup>2</sup>

The combination of polyester and cotton is strong and enduring but still comfortable to wear. The material has excellent ventilating features and is therefore highly suitable

to wear as bottom or middle layer.

The HEROCK® polos are only a few of the items that are made using this material. The fabric is also colorfast and wearproof.

### 80% COTTON 20% POLYESTER JERSEY PRE-SHRUNK

This pre-shrunk combination of polyester and cotton makes every piece of clothing a joy to wear. Thanks to the cotton, the fabric remains soft, while the polyester ensures an increased durability and colorfastness. Its minimal weight makes this material perfect for a long day of work.

### 100% POLYESTER ACTI-FLEECE

This lightweight microfiber fleece fabric ensures its wearer a maximum of comfort and a minimum of heat loss. That is why this material is perfect to be worn as a middle layer for optimal insulation.

### 100% POLYESTER 330G/M<sup>2</sup> WINDPROOF & BREATHABLE ACTI-FLEECE

This lightweight fleece fabric guarantees its wearer a maximal insulation. Thanks to its high durability, this material can be worn as an outer layer, but its breathing features also make it perfect to wear as a middle layer for extra protection against wind and rain. This fabric is perfect for heavy duty work in harsh conditions.

### SOFTSHELL

The mix of polyester and elastane ensures an excellent insulation and provides a great transport of transpiration moisture. Softshell clothing is light, water-repellent and windproof. On top of that, the material is very flexible, a feature that adds significantly to the wearer's comfort.

## DECLARATION OF CONFORMITY

We guarantee that we always use the same production methods for our standardized clothing and shoes and that we always use the same materials/fabrics that were tested to reach the standardization; Upon request we can deliver all the CE-certificates. You can turn to the website for the declarations of conformity for standardized/certified clothing and shoes.

[www.herockworkwear.com/conformity/ce.html](http://www.herockworkwear.com/conformity/ce.html)

# STAND OUT EVEN MORE AND HAVE ALL YOUR HEROCK® WORKWEAR CUSTOMIZED!

The items in our collection can be customized to fit the wishes of any client, whether it's a big corporation with a lot of employees or a one man company that employs a few experts. It allows you to create a personalized outfit that clearly features the logo of your business. You can even design an entire collection of your own company clothing. A real craftsman can be proud of a job well done and can rightfully take credit for his work by signing it with his own name. That's why HEROCK® always makes sure that every item of our design leaves enough space for adding an extra detail, so you can take credit for your expertise as well! Contact your HEROCK® dealer for more details regarding the customizing of our items and the technologies that are available (printing, embroidery, transfer...).

**CUSTOMIZE YOUR  
ZIP PULLER  
SO YOUR HEROCK®  
CLOTHES LOOK  
MORE LIKE YOU.**

# TEAMWEAR

**ARE YOU LOOKING FOR AN EASY WAY TO INCREASE YOUR TEAM'S PRODUCTIVITY AND HAVE YOUR TEAM STAND OUT AS A STRONG UNITY?**

Look no further: here is Teamwear! By introducing Teamwear, HEROCK® does not only provide your team with a sense of connection but also allows your team to enjoy professional and state of the art workwear. At HEROCK® we develop workwear that meets every professional's needs to the smallest detail. It's all in the pocket. All HEROCK® workwear has been designed in collaboration with craftsmen from various sectors.

In order to help you with your choice, we have divided our products over 5 categories:

# SHEROCK®

WOMEN'S WORKWEAR

**SHEROCK®! DESIGNED BY AND FOR WOMEN,  
COMPLYING WITH THE HIGH SHEROCK® STANDARDS,  
AND ADAPTED TO THE NEEDS OF HERO-WOMEN.  
PERFECT FIT, HIGH QUALITY, TOTALLY SHEROCK®!**

# FIND A STORE

**LOOKING FOR A HEROCK® STORE NEAR YOU?  
USE OUR STORE LOCATOR!**

On the HEROCK® website you can find a local dealer by clicking on 'FIND A STORE' in the selection menu. You can then enter your country and postal code to obtain the list of local dealers.

## THERE ARE 3 TYPES OF DEALERS:

### 1. HEROCK® STORE

The HEROCK® store is a shop-in-shop concept where you can view, purchase or order the HEROCK® collection. These shops have at least a 6m concept with the HEROCK® workwear.

### 2. HEROCK® DEALER

The HEROCK® dealer is a reseller where you can order the HEROCK® collection or contact someone for a presentation at your company. The HEROCK® dealer does not always have all items in stock and usually works by appointment, so it is best to contact him first!

### 3. HEROCK® WEBSHOP

The HEROCK® webshop is a platform where you can order the HEROCK® collection online.

## CONCEPTS

# GO FAST

# SPONSORING & EVENTS

**HEROCK® IS INTERNATIONALLY PRESENT AT NUMEROUS EVENTS, AND ACTIVELY TRAVELS WITH A NUMBER OF TOP TEAMS ACROSS EUROPE. THE COOPERATION WITH THE DIFFERENT TEAMS USUALLY RESULTS FROM THE SAME VISION, TEAM SPIRIT, PERSEVERANCE AND PARTICULARLY THE DRIVE TO WIN. EVERYTHING MUST BE PERFECTLY COORDINATED FOR THIS, AND WE LOVE A SERIOUS BUT CALCULATED CHALLENGE. IT ALSO GIVES US THE OPPORTUNITY OF TESTING THE CLOTHING AT TOP LEVEL WHILE ENSURING THE NECESSARY VISIBILITY OR NETWORK.**

**WE ARE THE ONES WHO BUILD  
YOUR HOUSES AND CITIES.  
WE CONSTRUCT THE ROADS  
AND BRIDGES THAT CONNECT  
THE ENTIRE WORLD. WE KEEP  
YOU SAFE AND DRY WHEN  
THE SKIES FALL DOWN.  
WHEN SOMETHING IS BROKEN,  
WE ARE THE ONES WHO FIX IT.  
WE STAND OUR GROUND IN THE  
FACE OF STORMY WEATHER,  
DIZZYING HEIGHTS AND ALL  
THE OTHER DANGERS THAT  
STAND IN OUR WAY.  
WE ARE THE ONES WHO MAKE  
SURE THAT THE WORLD KEEPS  
ON GOING ROUND AND ROUND.  
WE ARE HEROES.**
