TECHNICAL PERFORMANCE. BUILT TO MOVE.

NEW

RAGNAR

BUILT FOR THE JOBS WHERE THE WEATHER DOESN'T CARE ABOUT YOUR DEADLINE.

Ragnar features a windproof 3-layer softshell with a high-level waterproof membrane, stretch comfort and practical detailing for reliable performance on site.

It combines a 10,000 mm waterproof membrane with 5,000 mvp breathability, wrapped in a flexible 4-way stretch ripstop fabric for protection from the elements without feeling restrictive.

Reinforced shoulders and elbows take the daily wear, while the adjustable, removable hood keeps you protected without getting in the way. An extended back panel keeps you covered, while underarm ventilation zips help regulate your temperature on the move.

ADVANCED 3-LAYER PROTECTION FOR PROFESSIONALS.

RAGNAR IS BUILT IN THREE TECHNICAL LAYERS THAT WORK TOGETHER: A TOUGH OUTER SHELL, A BREATHABLE MEMBRANE THAT BLOCKS OUT WIND AND RAIN AND A SOFT MICRO-FLEECE LINING THAT KEEPS THE WARMTH WHERE IT BELONGS.

The outer shell is built from 92% recycled polyester with 8% elastane, finished as a 75D micro-ripstop with TPU lamination. Shell and lamination work together to deliver 5000 mvp breathability and 10,000 mm waterproofness, so moisture gets out while rain, sleet and wind stay firmly on the outside. The ripstop weave helps prevent small snags and abrasions from turning into bigger problems, exactly what you need on a site full of sharp edges and rough surfaces. Altogether, the bonded construction weighs 280 g/m², giving the jacket a substantial feel without unnecessary weight.

On top of the shell, the areas that matter most feature targeted reinforcement in Cordura®-Sorona® stretch fabric, finished with a water-repellent coating. It covers the shoulders, pre-shaped elbows and forearms, the areas that take the daily punishment: crawling through tight spaces, leaning on scaffolding and dragging tools across rough concrete. Most jackets wear through here first. Ragnar doesn't.

On the inside is where the comfort lives. A 100% recycled polyester micro-fleece lining keeps body heat in without adding bulk, so the jacket stays warm without ever feeling stiff or heavy. Add waterproof zips, reinforced stitching throughout and a construction built to withstand wash after wash and you get a jacket made to be worn hard, every day, for years, not just photographed once and forgotten.

BUILT FOR THE DETAILS THAT MATTER

Ragnar's protection isn't just in the fabric, it's in the details that surround it. The adjustable, removable hood gives you extra protection when the weather turns and can be easily removed when you don't need it. Elasticated inner cuffs help keep draughts out at the wrists without restricting

movement, while the elasticated drawcord at the hem helps stop cold air from creeping in when you bend, lift or climb a ladder.

Storage is designed around how you actually work. A zipped chest pocket, two zipped side pockets, a sleeve pocket and an internal pocket give your phone, tools and other essentials a secure place. Underarm ventilation zips let you release excess heat when the pace picks up, helping you stay comfortable without overheating.

Nothing has been added without purpose. Every detail is there for a reason. None of it is decoration.

READY FOR PERSONALISATION

Ragnar comes in 3 colourways - ochre, anthracite and dark khaki - so you can match it to your crew, your site, or your corporate identity, all the way from XS to XXXL. With reflective black detailing for low-light visibility and a design made to carry your logo cleanly, Ragnar is as easy to brand as it is to wear. This is a jacket built for the job first, and it still looks sharp doing it.

RAGNAR COMES IN THREE COLOURWAYS TO MATCH YOUR TEAM, YOUR SITE, OR YOUR STYLE WITHOUT COMPROMISING ON PROTECTION.

THREE COLOURS BUILT FOR HARD WORK

Not every crew wants to look the same, and not every site calls for the same colourway. That's why Ragnar comes in three distinct options, each built on the exact same certified construction underneath.

Ochre/Black brings a bold, contemporary look to the work-day. Go for the understated strength of Anthracite/Black when your crew needs something that reads professional in any setting, from the workshop floor to the client meeting. Or pick the rugged, outdoor edge of Dark Khaki/Black if your work takes you off-site and into the elements. Whichever you choose, you're getting the same 3-layer shell, the same high-performing membrane, the same Cordura®-Sorona® reinforcement in the high-wear zones, and the same fit. Same performance, same attention to detail - just pick the colour that fits your crew.

That consistency matters when you're outfitting a whole team. Mix colourways across departments or roles without ever mixing quality. Every Ragnar jacket, regardless of colour, meets the same EN ISO 13688 and EN 14058 certifications, so choosing on looks never means compromising on protection.

DURABILITY YOU NOTICE AFTER MONTHS OF HARD WORK.

The colourway is the easy choice. What actually matters is what's underneath. The ripstop shell resists tearing and abrasion from day one and the reinforced elbows and shoulders are built to take the exact kind of wear that ends most jackets early: crawling, kneeling, leaning, dragging.

That durability isn't a one-season promise. Wash after wash, shift after shift, Ragnar is designed to keep its shape and its protective qualities, so it keeps doing its job long after a lesser jacket would have been replaced. Whether you're outfitting one person or an entire crew, that's the difference between buying workwear and investing in it.

FARO & SPARO

A BESTSELLER WITH A FRESH NEW LOOK. FOR FALL/WINTER '26, FARO AND SPARO RETURN STRONGER THAN EVER IN THE NEW DARK KHAKI COLOURWAY, MADE FOR WORKERS WHO WANT PROVEN PERFORMANCE WITH A SHARPER SEASONAL EDGE.

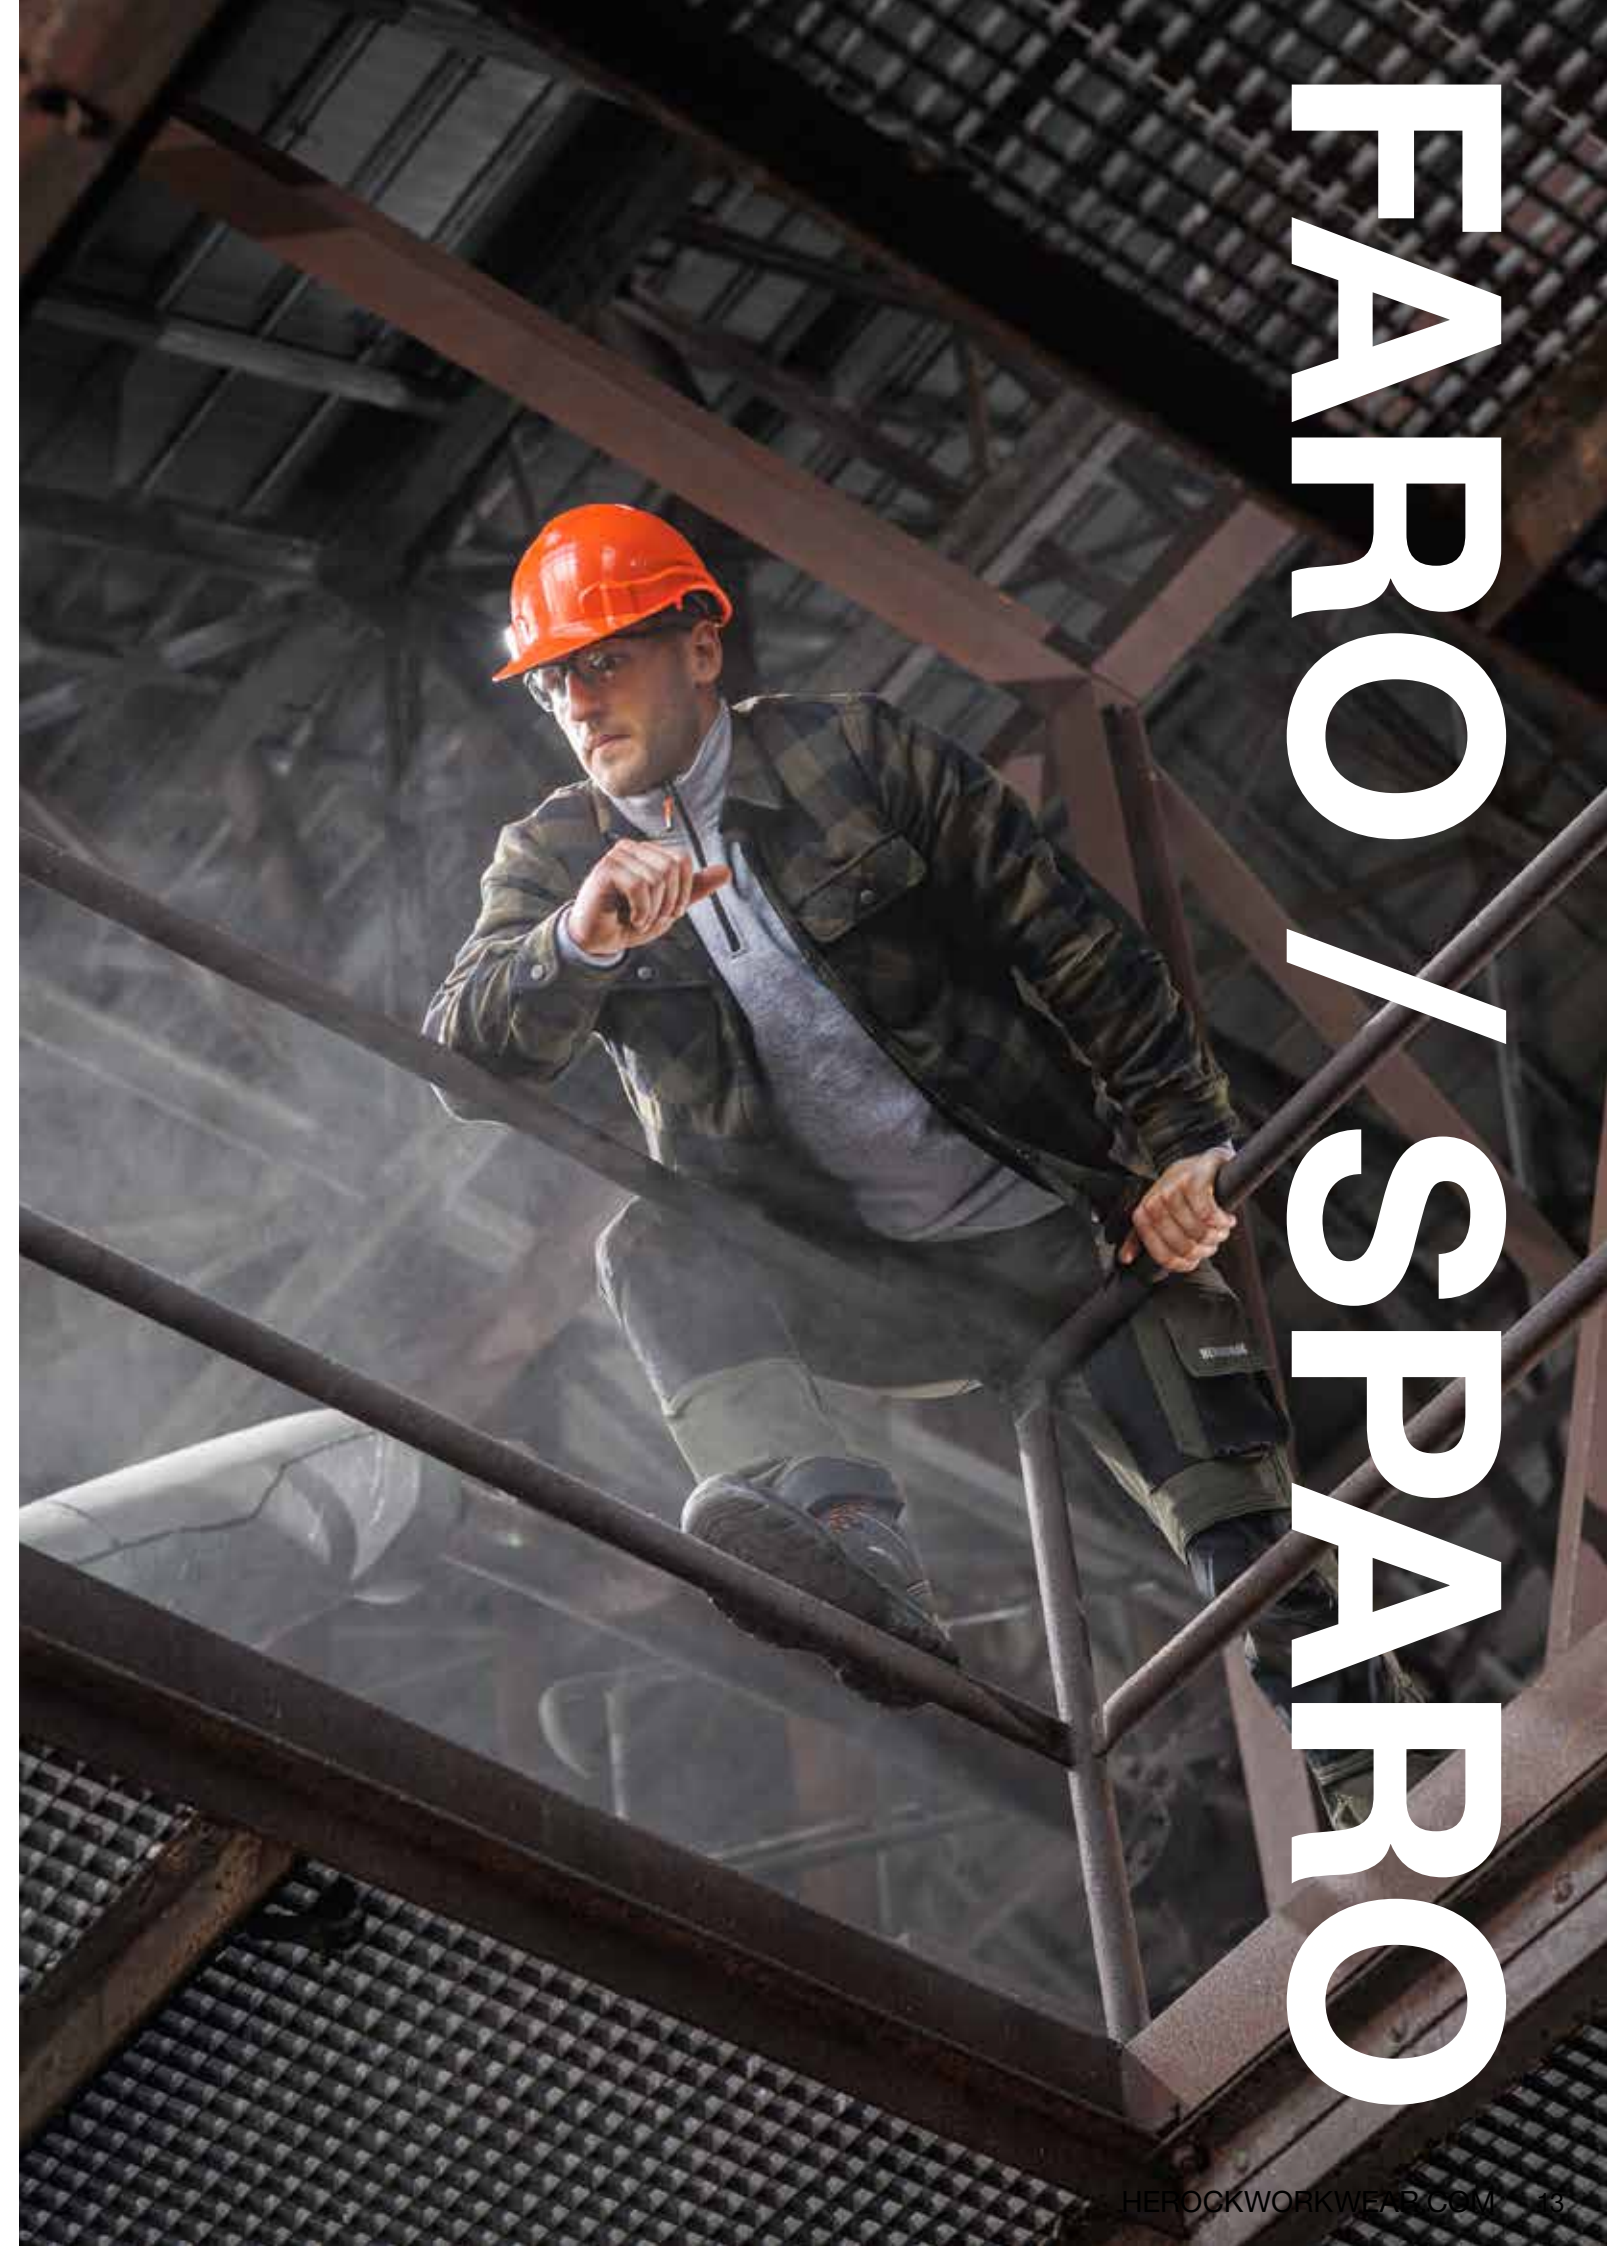

There is a reason Faro and Sparo are among our best selling trousers. They hit that sweet spot between comfort, strength and smart workwear design, the kind of trousers you put on in the morning and forget about, because they simply do the job. Built from 4-way stretch fabric with a water-repellent surface coating, they move easily through every bend, climb, kneel and “just one more task” moment. The slim fit keeps the look sharp and modern, while the soft-touch elasticated waistband adds comfort from the first coffee to the final job of the day.

The choice is yours: Faro keeps it streamlined without nail pockets, ideal for workers who prefer a clean, lighter feel. Sparo adds nail pockets for extra carrying power when the job asks for more tools close at hand. Same strong DNA, different pocket power.

Made for real work, both trousers feature smart multi-pocket storage, a reinforced mobile pocket, ruler pocket, knife holder with anti-scratch button, hammer loop and reflective prints for extra visibility. High-wear zones are strengthened with Cordura®-Sorona® stretch reinforcement, including the thigh area, back pockets, knee pockets and extendable hem. In other words: they are not scared of rough surfaces, busy days or a bit of chaos on site.

NEW FOR FALL/WINTER '26

Now available in Dark Khaki/Black, alongside Black, Anthracite/Black and Navy/Black. Combined with HEROCK® knee protection 21MI0901, Faro and Sparo are certified to EN 14404 Type 2 Level 1. Strong, flexible and proven on the job, this best-seller is ready for a new season, with a fresh colourway that feels bold, practical and seriously easy to wear.

FARO / SPARO

MULTI NORM.

ONE OUTFIT, MULTIPLE RISKS. HEAT AND FLAME, WELDING, ELECTROSTATIC CHARGE, ELECTRIC ARC AND CHEMICAL LIQUIDS, ALL COVERED IN ONE MULTINORM WORKWEAR SOLUTION.

Some jobs don't come with a single, clearly defined risk. In one shift, the same person can face welding spatter, static discharge near flammable vapours and the splash of a chemical liquid. That is exactly where this multinorm set earns its place. Because one versatile outfit covers multiple industrial risks at once, there is less need for separate protective garments for every individual hazard. Your team gets the optimal combination of safety and practical usability, in one set that performs across very different working environments.

The certification icons are marked directly on the outside of the garments, making the protection offered by the set clear at a glance. Rather than having to look up a separate label or specification, the relevant standards are visible on the garment itself, providing a clear reference to the certified protection it offers.

COMPLETE PROTECTION IN ONE SMART PACKAGE

The jacket and trousers are designed specifically around the requirements of multinorm protective wear. That means the protection is considered not only in the materials and certifications, but in the way the garments are constructed and used on the job. Concealed zips, closed pocket openings and secure closures help prevent sparks, debris and other workplace hazards from getting where they shouldn't, while keeping the garments practical to use throughout the day.

The design also puts everyday functionality within easy reach. Multiple pockets provide dedicated space for tools and essentials, while dosimeter holder loops give teams a fixed, secure place for their equipment to monitor exposure. Press-stud closures are easy to operate - even with gloves on - and the concealed front zip adds an extra layer of protection. The trousers also feature dedicated knee pockets for the insertion of knee protectors, adding practical support for work that requires frequent kneeling.

From heat and flame to welding, electrostatic discharge, electric arc, chemical exposure, enhanced visibility and knee protection, the set is designed around multiple workplace risks. Every detail has a purpose, from the way the pockets close to the placement of the protective features. It is multinorm protection designed to work as hard and practically as the people wearing it.

MULTINORM PROTECTION DOESN'T HAVE TO FEEL STIFF. THE SATIN WEAVE GIVES IT A SMOOTH, COMFORTABLE FEEL AND A PREMIUM LOOK, WHILE THE FABRIC WEIGHT STRIKES THE RIGHT BALANCE BETWEEN PROTECTION, DURABILITY AND WEARING COMFORT.

Multinorm garments have a reputation for feeling stiff, heavy and more like armour than clothing. The satin weave changes that. It gives the jacket and trousers a smooth, pleasant feel that moves with you rather than against you, keeping you comfortable from the first hour of the shift to the last. No stiffness when you reach, bend or kneel, no fabric fighting back when the pace picks up.

The satin weave also gives the garments a clean, professional appearance. The smooth structure makes the set look premium and considered, without taking away from its purpose as protective workwear. Feeling protected and looking sharp were never meant to be a trade-off, and with this set they aren't.

At 260g/m², the fabric offers a well-balanced weight, making the set particularly well suited to long shifts and warmer working environments. It provides the substance needed for protection and durability without adding unnecessary weight, helping you stay comfortable when the temperature rises or the working day stretches on.

Protection, durability, comfort and a professional look — all in one considered construction.

MADE FOR INDUSTRIAL WASHING, MADE TO LAST. Protective workwear only protects if it's actually worn, and it only keeps getting worn if it survives being washed as often as the job demands.

That is why this fabric is built for industrial wash processes, not just a gentle home cycle. The set is designed for professional use where clothing is washed regularly, intensively and at higher temperatures than everyday garments ever see. Frequent industrial washing puts real demands on fabrics, colours and construction, so durability through the wash cycle is essential. This set is made to go through that cycle again and again while keeping its performance intact, which supports a longer working life for the garment and a better return on every piece.

That also makes it a practical choice for professional laundries and clothing services that manage workwear for entire teams.

LAVO 20MJC2601

The HEROCK® multinorm jacket combines certified protection, comfort, and functionality with a water- and dirt-repellent surface, flame-resistant reflective tapes, contrast detailing, adjustable cuffs, extended back panel, dosimeter holder loops, and a practical multi-pocket design.

MULAN 20MTR2601

The HEROCK® multinorm trousers deliver certified protection, durability, and comfort for demanding work environments. Featuring a water- and dirt-repellent surface, flame-resistant segmented reflective tapes, elasticated waistband, raised back waistband, extendable hem, knee pockets, and a functional multi-pocket design.

MULTINORM STANDARDS

EVERY STANDARD ON THIS PAGE REPRESENTS A REAL HAZARD, TESTED AGAINST STRICT REQUIREMENTS AND BUILT INTO THE DESIGN AND CONSTRUCTION OF THE SET. THIS IS WHAT MULTINORM PROTECTION LOOKS LIKE, SPELLED OUT.

Certification labels can look like small print, but each icon in multinorm protection stands for a specific, real-world risk: heat and flame, welding and allied processes, electrostatic discharge, electric arc and limited chemical exposure. Each standard has its own test methods and its own requirements, and this set meets them all in one garment.

That combination is what makes multinorm workwear more than the sum of its parts. Real job sites rarely present one risk at a time, and a set that covers them together means your team never has to choose which hazard to dress for, or layer separate certified garments that were never designed to work as one.

ENHANCED VISIBILITY, DESIGNED TO MOVE

The set features segmented heat transfer tapes and meets EN 17353 for enhanced visibility, adding an extra layer of safety on the work floor in daylight and in low light. The key is how the tapes are integrated into the garment. Heat-transfer tapes replace traditional stitched-on reflective elements, while the segmented design allows them to flex with the fabric rather than restricting movement or adding stiffness. The result is visibility, flexibility and freedom of movement combined in one solution, keeping the wearer comfortable and unrestricted throughout the working day. It is a small detail with a real effect on how the set wears through a full shift.

HEAT AND FLAME PROTECTION
Protection against heat and flame, designed for industrial environments where workers may face brief flame contact and exposure to radiant, convective or contact heat.

WELDING PROTECTION
Protective workwear for welding and allied processes, engineered to resist molten metal spatter, brief flame contact and radiant heat for safer professional performance.

ELECTROSTATIC PROTECTION
Antistatic protective clothing designed to dissipate electrostatic charges and reduce the risk of ignition in potentially explosive environments, meeting the material and design requirements of EN 1149-5.

ELECTRIC ARC PROTECTION
Designed and tested to provide protection against the thermal hazards of electric arcs, meeting the requirements of the applicable electric arc protection standard for work around electrical installations.

LIMITED CHEMICAL PROTECTION
Protection against limited exposure to liquid chemicals, providing resistance to light spray and splashes in accordance with the requirements of the applicable chemical protection standard.

ENHANCED VISIBILITY
Enhanced visibility workwear for medium-risk situations, using retroreflective materials to improve wearer visibility in low-light conditions and under illumination from vehicle headlights.

KNEE PROTECTION
Certified knee protection for work in kneeling positions, helping reduce pressure and impact while meeting EN 14404 performance and safety requirements.

INDUSTRIAL WASH PERFORMANCE
Designed for professional laundering, tested using industrial wash procedure 8 and tumble drying at temperatures up to 70°C for durable, dependable performance wash after wash.

EASY COMFORT, STRONG ATTITUDE AND READY FOR ANYTHING. ICON DELIVERS FRESH HEROCK® ENERGY FROM BUSY WORKDAYS TO LAID-BACK DOWNTIME.

ICON

22MSW2601

The Icon hooded sweater is built from 80% organic cotton and 20% polyester jersey 330g/m², giving it a soft touch with solid everyday strength. The HEROCK® print adds instant identity and a confident workwear look, while the kangaroo pocket keeps things practical for cold hands or small essentials. Rib-knit cuffs and bottom hold the fit in place, whether you are on site, in the workshop or off the clock. Available in Black, Navy and Dark Khaki, Icon is an easy layer with serious HEROCK® attitude.

LIMITED
EDITION

2026

HYBRID

23MJC2502

WARM WHERE YOU NEED IT. FLEXIBLE WHERE IT COUNTS. THIS HYBRID QUILTED JACKET BRINGS HEROCK® ATTITUDE TO EVERY MOVE.

Built for active workdays, this jacket combines warm quilted body areas with stretch softshell panels for easy movement and comfort. Made with recycled materials, it brings together durability, flexibility and a more sustainable approach to workwear. The contrast fabric is breathable and backed with ripstop fleece for extra strength. Orange details add a bold, modern edge, while zipped chest and side pockets keep essentials secure. Elasticated cuffs and bottom help lock in warmth.

GUNNAR & SILVAR

22MTR2601 / 22MTR2602

4-WAY STRETCH TROUSERS BUILT FOR WORKDAYS IN MOTION. GUNNAR AND SILVAR OFFER A LIGHT, EASY-WEAR FEEL, FLEXIBLE COMFORT AND TOUGH PERFORMANCE WHEN THE PACE PICKS UP.

Some workdays demand more from your trousers. More movement. More comfort. More durability. That is where Gunnar and Silvar step in. Made from light-feel 4-way stretch ripstop fabric, they follow every bend, climb and stride without holding you back. The tailored fit gives them a clean, modern look, while the water-repellent surface coating adds protection when the job gets messy.

The difference is in the details. Ventilation zippers bring airflow as activity rises. Reflective details add visibility in low light. Smart pockets keep your tools and essentials close, without overloading the fit. Gunnar keeps it sleek and light-weight without nail pockets. Silvar adds nail pockets for extra carrying power when the job calls for it.

REINFORCED FOR REAL WORK

The reinforced knee pockets and 5 cm extendable hem are made of durable Cordura®-Sorona® stretch fabric for extra resilience where it matters most. The garment is EN 14404 Type 2 Level 1 certified and designed for HEROCK® knee protection, making it well suited for work in kneeling position.

ORION

22MJC2501

COLD MORNINGS, HEAVY CLOUDS, RAIN ON THE WAY. ORION KEEPS WARMTH IN, WEATHER OUT SO YOU CAN FOCUS ON THE WORK AHEAD.

The Orion padded jacket is built for workdays ruled by rough weather. Waterproof fabric, taped seams and warm padding help protect you from wind, rain and cold, while the ergonomic fit keeps every movement easy. Smart details bring comfort and control: a foldable adjustable hood, extended back panel, elasticated inner cuffs, zipped pockets and reflective accents for darker days. Made from 100% recycled polyester, Orion is durable, easy to personalise and certified to EN 343 Class 3/1 for serious wet-weather performance.

KIDS ICON

22KSW2601

SMALL SIZE, BIG ATTITUDE. KIDS ICON GIVES YOUNG EXPLORERS THE HEROCK® LOOK, WITH EASY COMFORT MADE FOR EVERY ADVENTURE.

The Kids Icon hooded sweater is made from 80% organic cotton and 20% polyester jersey 330g/m², giving it a soft feel with solid everyday strength. Designed as the kids' version of the adult Icon sweater, it brings the same HEROCK® style in smaller sizes. The HEROCK® print adds a cool workwear-inspired look, while the kangaroo pocket keeps little hands warm and essentials close. Rib-knit cuffs and bottom help the fit stay comfortable during play, school days or weekend adventures.

NORR

22MSW2602

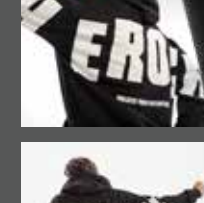

CLEAN, BOLD AND EASY TO WEAR. NORR ADDS A FRESH HEROCK® EDGE WHEREVER THE DAY TAKES YOU.

Made from 80% organic cotton and 20% polyester jersey 350g/m², the Norr hooded sweater feels soft, solid and built for daily use. The HEROCK® print gives it a strong workwear identity, while the kangaroo pocket adds easy comfort for cold hands or small essentials. Rib-knit cuffs and bottom keep the fit sharp, secure and ready to move.

Whether you wear it on site, in the workshop or after hours, Norr keeps things simple: no fuss, no overthinking, just reliable comfort, fresh style and a confident HEROCK® look.

COLD DAY? BRING IT ON. THE RIGHT OUTFIT KEEPS YOU WARM, SHARP AND READY TO MOVE.

When the temperature drops, your outfit becomes more than just workwear, it becomes your comfort zone. A strong cold-weather look keeps warmth in, wind out and your focus where it belongs: on the job. Think smart layers, protective fabrics and fits that move with you, not against you.

No stiff jackets. No freezing breaks. No losing energy because the cold is taking over. The right outfit helps you stay comfortable during slow moments, flexible when the pace picks up and protected when the weather turns rough. From early starts to late finishes, good cold-weather gear gives you that extra boost to keep going. Warm, practical and ready for action, exactly how winter workwear should feel.

BE READY FOR COLD WINTER DAYS

STAY VISIBLE

- ✓ Class 1 • Class 2 • Class 3
- ✓ Maximum visibility on site
- ✓ Compliant with safety standards
- ✓ Certified for professional work environments

OUR HIGH-VISIBILITY GEAR MAKES YOU STAND OUT ON ANY JOB SITE: BOLD, TOUGH AND ALWAYS COMPLIANT. NO SHORTCUTS, NO COMPROMISES - JUST MAXIMUM SAFETY WITH THE HEROCK® ATTITUDE.

AND COMFORT?

We don't compromise there either. Soft durable fabrics, smart fits and full freedom of movement keep you safe, comfortable and focused through every shift. Every seam, zipper and finish is designed so you can move freely and perform at your best. Because comfort isn't just about technology - it's about peace of mind.

Strong, safe and comfortable. That's the standard you deserve.

CO- CERTIFI- CATION

IN HIGH-RISK WORK ZONES, VISIBILITY IS CRITICAL FOR SAFETY. EN ISO 20471 CO-CERTIFIED CLOTHING OFFERS FLEXIBLE PROTECTION THAT ADAPTS TO CHANGING TASKS AND CONDITIONS. WITH HEROCK®, TEAMS STAY SAFE, COMPLIANT AND COMFORTABLE- SUPPORTED BY A SUSTAINABLE SOLUTION BUILT FOR TODAY'S DEMANDING WORK ENVIRONMENTS.

EN ISO 20471 co-certification allows workers to combine certified garments - like trousers and jackets - to reach a higher visibility class. This system offers flexibility without compromising safety. For example, Class 1 trousers combined with a Class 2 jacket can meet Class 3 standards, the highest level of visibility.

This benefits employees by increasing comfort, mobility and safety, especially in changing weather or light conditions. Workers feel more confident and focused, knowing they are protected and visible at all times.

For companies, co-certified garments show a clear commitment to safety, help meet legal standards and reduce costs by enabling layered solutions. It's a practical, future-ready approach to worker protection.

HEROCK® delivers durable, high-quality and sustainably produced workwear that meets strict certification standards. Our co-certified clothing supports performance, safety and corporate responsibility - because visibility isn't just a feature; it's a promise.

SAFETY FOOTWEAR

THE VITAL ROLE

SAFETY FOOTWEAR IS PART OF THE WORKER'S PERSONAL PROTECTIVE EQUIPMENT (PPE). IT IS ESSENTIAL TO WEAR IT WHEN THE ACTIVITY TO BE PERFORMED REQUIRES IT.

Safety is of paramount importance in the busy world of industrial and construction environments and a key aspect of this is the use of appropriate safety footwear. It plays a crucial role in protecting workers from potential hazards such as heavy objects, sharp materials or slippery surfaces. These specialized shoes are carefully constructed to provide extensive protection, not only to protect the feet from physical injury but also to improve overall comfort during long periods of wear. When you look at the components of safety shoes, you see intricate details that combine to contribute to durability, functionality and compliance with safety standards. From reinforced safety toe caps to slip-resistant soles, each component of the safety shoe serves a purpose in the well-being of those who must face challenging working environments.

3

HEROCK® COMFORTSTEP

Setting a new standard in ergonomic design, the HEROCK® COMFORTSTEP footbed conforms to the natural contours of the foot, providing unmatched support and cushioning. Experience a comfortable fit and enhanced foot health with the HEROCK® COMFORTSTEP footbed.

1

OUTSOLE

The HEROCK® outsole, made from materials like PU, PU/rubber or EVA/rubber, provides superior abrasion resistance and grip, making it an essential part of our safety shoes.

4

UPPER MATERIALS/TECHNOLOGY

HEROCK® offers a diverse range of upper materials, such as leather, suede TPU and different kinds of textile technologies, securing a blend of quality and versatility. This array of materials is carefully chosen to provide the best possible quality and comfort for the working HERO.

2

HEROCK® SAFESTEP

Engineered with advanced materials, the HEROCK® SAFESTEP midsole provides an outstanding protection against sharp objects and delivers durability and reliability making it an essential component for those seeking uncompromising safety.

HEROCK® SAFESTEP

THE HEROCK® SAFESTEP ANTI-PERFORATION MIDSOLE SETS THE NEW FOOTWEAR STANDARD PER EN ISO 20345:2022, ENSURING A HIGHER LEVEL OF SAFETY.

Engineered with advanced materials, this non-metallic midsole protects against punctures and sharp objects. The anti-perforation midsole meets PS requirements, having passed a penetration test with a 3 millimetre diameter nail. It provides peace of mind in demanding work environments while meeting the updated standard. HEROCK® SAFESTEP combines durability and reliability for uncompromising safety. Step confidently forward, knowing HEROCK® SAFESTEP offers maximum penetration resistance, protection and confidence with every confident stride.

HEROCK® COMFORTSTEP

THE HEROCK® COMFORTSTEP ERGONOMIC FOOTBED REVOLUTIONIZES FOOTWEAR COMFORT.

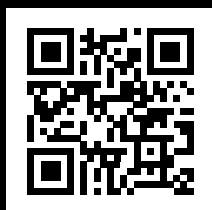

Engineered with precision, it conforms to the natural contours of the foot, providing unmatched support and cushioning for heel and arch. Crafted for extended wear, this footbed alleviates pressure points, promoting a comfortable experience all day long. Experience a comfortable fit and enhanced foot health with the HEROCK® COMFORTSTEP footbed, setting a new standard in ergonomic design. Step into the future of comfort, where every stride embraces a level of luxury and support that only HEROCK® COMFORTSTEP can deliver.
