GREEN HEROES.

WE AT HEROCK® HAVE PURPOSELY DECIDED TO MAKE SUSTAINABILITY AN INTEGRAL PART OF OUR BUSINESS. WE FIRMLY BELIEVE THAT WE HAVE A RESPONSIBILITY TO OUR CUSTOMERS, THE ENVIRONMENT AND SOCIETY. TOGETHER WITH OUR CUSTOMERS, WE MAKE A DIFFERENCE EVERY DAY AND MAKE VALIANT EFFORTS NOT ONLY IN TERMS OF OUR ACTIVITIES BUT ALSO WITH RESPECT TO THE PROTECTION OF OUR ENVIRONMENT.

1. Protecting the Environment

We are well aware of the impact the fashion and clothing industry has on the environment. By putting sustainability at the heart of our activities we aim to minimize this impact by reducing waste, using renewable and recyclable materials, minimizing our energy consumption and cutting back on our CO₂ emissions. By implementing these measures we help to protect eco systems, preserve natural resources and reduce the impact of climate change.

2. Enhanced Product Quality

Sustainability goes hand in hand with the creation of high-quality products. HEROCK® aims to produce sustainable workwear that will withstand demanding working conditions, will last a long time and is comfortable to wear. By investing in quality we reduce the need for frequent replacements, which extends the service life of our products and reduces the overall impact on the environment.

3. Social Responsibility

We believe that good working conditions should be safeguarded and employment rights should be respected throughout the entire supply chain. HEROCK® collaborates with manufacturers who comply with stringent ethical standards and provide honest wages and safe working conditions without the use of child labor. We believe that our responsibility does not stop with the end product but extends to the people who have contributed to its creation.

4. Customer Focus

We are aware that customers are increasingly making deliberate choices and focusing on sustainable products. HEROCK® wants to meet this demand and provide its customers with workwear that is both functional and of superior quality and complies with relevant sustainability standards. We aim to be a partner for our customers, who are committed to responsible consumption and enable them to generate positive changes through their purchasing decisions.

5. Innovation and Focus on the Future

Because we are opting for sustainability, we are able to focus on ongoing innovation and improvement. We continue to look for new ways to improve our processes, materials and products to further enhance the sustainability of our activities. We believe that sustainability is not merely a trend but the only way in which to safeguard a viable future. By being a pioneer in sustainability we hope to inspire others and generate a positive impact together.

The HEROCK® sustainability policy is based on several key basic principles. First and foremost we aim to reduce our ecological footprint by using sustainable materials and production methods that are less damaging to the environment. Secondly, we employ ethical and responsible production processes, in partnership with suppliers who comply with stringent social and employment standards. We also stimulate a circular economy by recycling and reusing materials. By implementing these basic principles HEROCK® is contributing to a more sustainable future for the workwear industry.

CLOSE THE LOOP.

WE AT HEROCK® BELIEVE THAT SUSTAINABILITY IS NOT MERELY A TREND, BUT A NECESSITY TO SAFEGUARD A VIABLE FUTURE. TOGETHER WE AIM TO CREATE A WORLD IN WHICH RAW MATERIALS ARE RECYCLED, WASTE IS REDUCED AND OUR IMPACT ON THE ENVIRONMENT IS MINIMIZED. WE ARE DETERMINED TO CONTINUALLY IMPROVE OUR PRODUCTS, PROCESSES AND PARTNERSHIPS IN ORDER TO ACHIEVE THIS OBJECTIVE. WE HOPE TO INSPIRE OTHERS BY EMBRACING THE POWER OF SUSTAINABILITY AND CIRCULARITY.

At HEROCK®, we aim for a 'Close the Loop' sustainability flow, the solution towards a circular economy. We believe that promoting sustainability is not only our responsibility but also an opportunity to bring about positive change.

By working towards a Close The Loop Sustainability Flow, we strive to reduce our environmental impact and pave the way for a circular future.

One of the key principles of 'Close the Loop' is the creation of a closed loop, in which products are recycled and reused at the end of their service life. This matches our vision perfectly. We are convinced that sustainable workwear should be produced not only with due regard for the environment but should also be designed to have a longer service life. By using high quality materials and superior manufacturing techniques we aim to deliver workwear that will withstand demanding working conditions and will last longer.

Our 'Close the Loop' principle will ensure that our workwear is recycled and reused at the end of its service life rather than being consigned to the waste bin. Using innovative recycling methods we are able to recover materials such as textile fibers and metals from discarded items of clothing and reprocess them into new products. This reduces the demand for new raw materials and the impact on the environment and contributes to the preservation of natural resources.

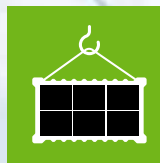

We also promote awareness and create educational programs. We aim to inform our customers and the wider community about the benefits of a circular economy and about how they can proactively participate in closing the loop. We want to encourage them to return old workwear to us so that we can recycle and reuse it in new products. By joining forces we can have a powerful impact and make a difference in the world around us.

WE FIX THE BASICS.

RENEWABLE ENERGY

Providing our own electricity using maximum numbers of solar panels on our buildings.

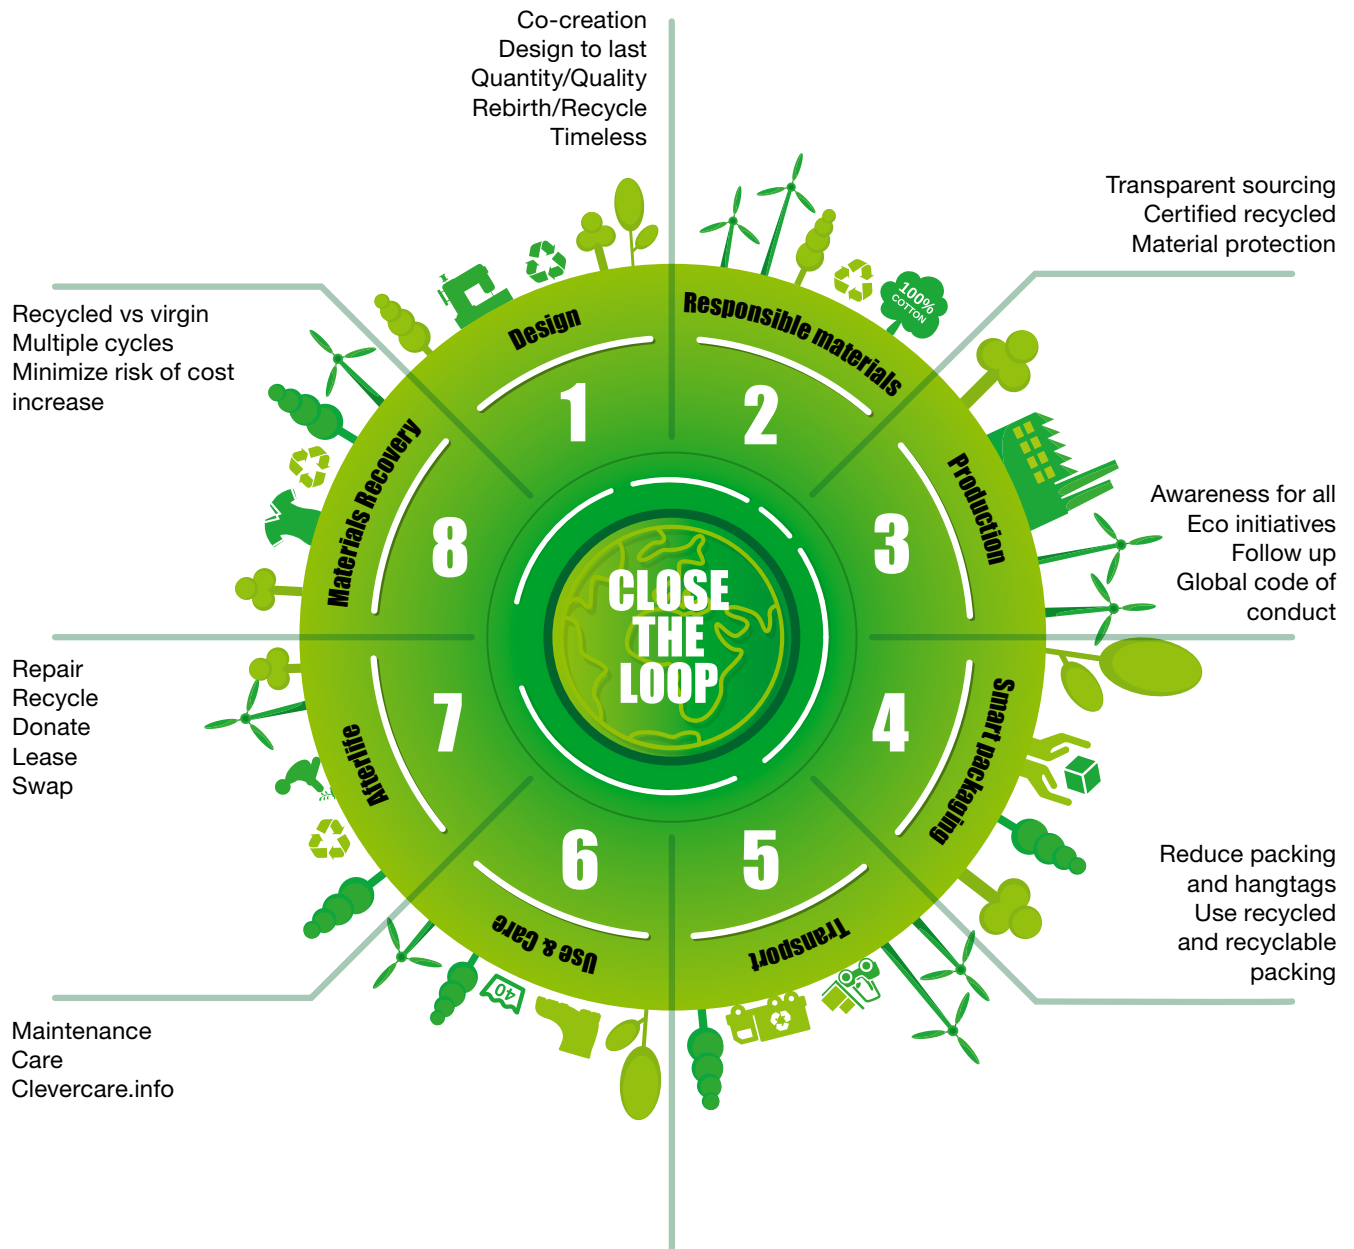

CONTAINERS

Maximum container loading.

FABRICS

Recycled, sustainably produced materials.

ECOLOGIC FOOTPRINT

Limited number of production partners to promote optimum efficiency and minimize our ecological footprint.

FLEET

Electrification of our vehicle fleet.

BAGS & PACKAGING

Recycled paper rather than plastic carrier bags.

LESS AIR CARGO

Limiting air freight by increasing our stock positions.

3-LAYER SYSTEM.

A CORRECT APPLICATION OF THIS 3-LAYER SYSTEM IS A GUARANTEE FOR AN OPTIMAL PERFORMANCE AND ALLOWS YOU TO WORK AS FREELY AND COMFORTABLY AS POSSIBLE.

An optimal protection against varying weather conditions is created by combining the right items and fabrics. They do however have to complement each other in the right way, don't just randomly throw them together. The right combination of fabrics will allow you to continue working without being bothered by the weather or your own body heat and transpiration.

3 TOP LAYER

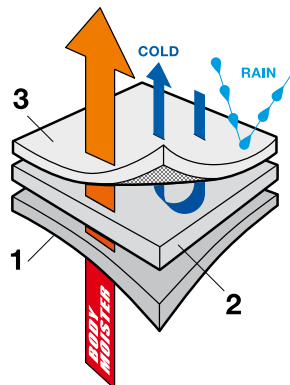

The main goal of the outer layer is to protect its wearer against all external conditions. Snow, rain or hail, your top layer has to keep it all out while passing on your own body heat and transpiration moisture to the outside. The ideal fabric for an outer layer is not only breathable, but also wind and waterproof.

2 MIDDLE LAYER

This layer keeps you dry and warm at the same time by passing on your transpiration moisture from the bottom layer to the top layer while keeping out the cold. Fleece, for example, is an ideal fabric for this layer because it passes on moisture while insulating your body against low temperatures.

1 BOTTOM LAYER

The bottom layer of your clothing has to ensure that your body heat and transpiration moisture find their way to the outside as quickly as possible. Wearing the right type of bottom layer prevents you from cooling down too quickly when you decide to take a break.

ERGONOMICS.

THE FIRST FUNCTION FOR EVERY ITEM IS TO PROTECT ITS WEARER AGAINST EXTERNAL FACTORS AND PHYSICAL INJURIES. HEROCK® DOES NOT JUST DESIGN ITS COLLECTIONS TO MAKE YOU LOOK GOOD WHILE YOU ARE AT WORK, WE ALREADY EXPLAINED THE PROTECTION AGAINST EXTERNAL CONDITIONS IN THE THREE LAYER SYSTEM.

However, protecting yourself against physical strain on your body by wearing the right clothes is equally important.

Carrying around heavy toolboxes, building materials and other equipment can start to weigh heavily on your physical frame. That is why our designers work hard on fortifying the crucial points in our clothing and taking a lot of pressure away from your muscles and joints. This is partly achieved by spreading out the weight of your tools and other instruments, ensuring that no part of the body is overburdened.

Our designs also ensure that you don't have to make any unnatural movements to access your equipment. We use techniques and fabrics from the sports industry to make our workwear as ergonomic as possible. After all, the efforts of a craftsman are often more intense than those of real sportsmen!

DESIGN.

WE ALWAYS GO THE EXTRA MILE. IN ORDER TO PROVIDE OUR CUSTOMERS WITH THE BEST SERVICE AND PERFECT WORKWEAR, OUR RESEARCH AND DEVELOPMENT TEAM NEVER LEAVES ANYTHING TO CHANCE.

We closely monitor every step of the development process, from initial design to manufacturing and so see that every product meets our high standards and those of our customers. We allow NO flaws, period.

HEROCK® continuously invests in product-improvement, based on the needs of the working hero. We always work with high-end brands and qualities such as Cordura®, YKK®, Wasa®, Pro-reforce, Coolmax®, Thermolite®, DuPont®, Sorona®, Flex 2000, Flexfit® and Meryl® Skinlife.

UNISEX.

THE TIME WHEN CONSTRUCTION WORKERS AND MASONS WERE EXCLUSIVELY MEN HAS PASSED FOR QUITE A WHILE.

HEROCK® is all about equality. That is why our entire collection is made for both men and women. We align every garment to the needs and wishes of a large group of working heroes, no matter what gender. You'll always find what you are looking for in the broad HEROCK® collection- workwear or accessory: a comfortable, durable and wear resistant pair of work trousers, wind resistant jackets, hats ... and, should you require a complete team wear fit- in many colours and sizes - HEROCK® will cater to your demand.

2 YEAR GUARANTEE.

HEROCK® provides the best possible service to its clients. It means that we do everything to make our clothing as durable and resistant as possible. Of course we do realize that there will always be an inevitable amount of wear and tear in a professional working environment. HEROCK® meets the highest demands in quality, we're able to provide a warranty on any production errors that might occur.

SHEROCK®

WOMEN'S WORKWEAR

BUILT FOR HER, READY FOR ANYTHING

HEROCK® CREATES WORKWEAR THAT TRULY FITS WOMEN. DESIGNED FOR PERFORMANCE, COMFORT AND DURABILITY - SO EVERY FEMALE WORK HERO CAN GET THE JOB DONE WITHOUT COMPROMISE.

The time when construction sites, workshops and factories were dominated by men is long gone. Today, women are excelling in every trade - from masonry and carpentry to installation, painting and technical services.

At HEROCK®, we believe equality means more than equal opportunities - it means having gear that fits and performs. Our entire collection is unisex, built to serve all working heroes. But we go further, offering specially tailored women's designs with patterns, cuts and details created to match the female body for maximum comfort and efficiency.

WHY WOMEN-SPECIFIC WORKWEAR MAKES ALL THE DIFFERENCE:

- **Perfect Fit for Women** - Tailored to follow the female shape at the waist, hips and chest, eliminating excess fabric and ensuring a professional, confident appearance.
- **All-Day Comfort and Mobility** - Ergonomic cuts reduce friction, improve flexibility and keep you comfortable from the first hour to the last.
- **Durable Protection for Any Job** - Made from HEROCK®'s premium, wear-resistant and weatherproof fabrics - built to handle the toughest work environments without compromising style or performance.

Because every professional - male or female - deserves workwear that works as hard as they do.

MADE FOR YOUR PASSION, SKILL AND SUCCESS.

DRIVEN BY PASSION AND PRECISION, OUR COLLECTION SPANS FIVE GROUPS, EACH TAILORED TO THE UNIQUE NEEDS, HIGH STANDARDS AND DAILY USAGES OF THOSE WHO DEMAND MORE.

This collection holds the basic needs for everybody who's eager to go to work: whether you're a professional doing your daily job or just a motivated handyman with a passion for home improvement, every search for the right tools begins here. The articles in this collection only carry the HEROCK® logo on the inside, which makes them perfect for adding extra prints or embroideries. Ideal if you've got a business to advertise!

ESSENTIALS

ADDITIONALS

This collection is the absolute apex of the HEROCK® arsenal: the items are specifically developed for professionals who need the absolute best. This collection contains our most exclusive items and our most enduring fabrics. The Expert collection is developed for any craftsman who would like to make the best impression on his customers.

Are you looking for an item that is designed for a specific job or needs to meet a particular demand? You will find it in the Additional collection. This collection is primarily aimed at professionals, but also the advanced handyman will find here what he or she is looking for. The products in this line are perfect for personalisation with your company logo or a specific design.

EXPERTS

INDUSTRY

HEROCK® high-visibility clothing meets the strictest EN ISO standards for safety and durability. Designed for professionals in construction, logistics and roadworks, our garments combine reflective detailing, robust fabrics and ergonomic cuts. HEROCK® ensures maximum visibility without compromising freedom of movement - built to perform in the toughest environments.

The Industry line is the latest collection developed for companies that need stretch, comfort, personalisation and easy maintenance. This collection is also aimed at larger companies and is always in stock in large quantities. The products are industrially washable and available in a wide range of sizes. Highlight your company and your employees with the new Industry line for a productive and safe working environment.

HIGH VIZ

WHY COTTON?

COTTON PRODUCTS BY HEROCK® STAND OUT FOR THEIR EXCEPTIONAL DURABILITY, CRAFTED WITH HIGH-QUALITY MATERIALS TO WITHSTAND DEMANDING WORK ENVIRONMENTS, ENSURING LONGEVITY AND RELIABILITY.

Prioritizing functionality, HEROCK® designs COTTON products with practical features that enhance performance and efficiency. Comfort is a key consideration, with ergonomic designs and breathable fabrics ensuring wearers stay comfortable without compromising on performance. The versatility of COTTON products makes them suitable for a wide range of industries and job roles. Beyond functionality, HEROCK® adds a touch of style to its products, presenting a modern and professional aesthetic for confident wear in any work setting.

BICOLOUR

HOW USING ORGANIC COTTON AND RECYCLED POLYESTER IS THE RIGHT CHOICE FOR YOUR WORKWEAR

HEROCK BICOLOUR LINE

“LESS WASTE, MORE STRENGTH AND MORE STYLE”

At HEROCK®, we proudly introduce our Bicolour Workwear Line, designed for professionals in industry, logistics, warehousing and construction. This innovative collection combines sustainability, durability and comfort, ensuring high-quality workwear that supports workers in demanding environments.

Made from organic cotton and recycled polyester (PES), our workwear prioritizes both performance and environmental responsibility. Choosing sustainable materials means reducing waste while maintaining strength and quality.

THE BENEFITS OF ORGANIC COTTON IN WORKWEAR

Organic cotton is a natural, ethical and durable alternative to conventional cotton. It is grown without pesticides, synthetic fertilizers, or harmful chemicals, making it an excellent choice for workwear.

- **Eco-Friendly** - Reduces water consumption and pollution.
- **Skin-Friendly** - Free from chemicals, reducing skin irritation.
- **Durable** - Naturally strong fibers ensure long-lasting wear.
- **Ethical** - Supports fair wages and sustainable farming.

By integrating organic cotton, HEROCK® guarantees softness, strength and sustainability in every garment.

THE BENEFITS OF RECYCLED POLYESTER (PES) IN WORKWEAR

Recycled polyester transforms post-consumer plastic into high-performance, eco-friendly fabric, reducing landfill waste.

- **Reduces Plastic Waste** - Prevents bottles from polluting landfills and oceans.
- **Energy Efficient** - Requires less energy to produce than virgin polyester.
- **Durable & Resilient** - Withstands demanding work environments.
- **Moisture-Wicking & Quick-Drying** - Enhances comfort for long shifts.

HEROCK® uses recycled PES to provide workers with functional, long-lasting workwear while reducing environmental impact.

WHY CHOOSE HEROCK®'S BICOLOUR WORKWEAR LINE?

HEROCK® workwear delivers top performance, comfort and sustainability with:

- **Resilient Fabrics** - Built to endure harsh conditions.
- **Eco-Friendly Materials** - Reducing carbon footprint.
- **Modern Design** - Professional style without sacrificing durability.

SUSTAINABLE WORKWEAR IS THE FUTURE

Sustainability is no longer a choice-it's a necessity. HEROCK®'s Bicolour Workwear Line allows workers to perform at their best while protecting the planet. By choosing eco-conscious workwear, you invest in quality, durability and a greener future.

Join us in making workwear work for both people and the environment.

STRETCH YOUR WORK.

HEROCK® FABRICS WITH 2-WAY AND 4-WAY STRETCH ARE DESIGNED TO PROVIDE UNPARALLELED FLEXIBILITY AND COMFORT IN DYNAMIC WORK ENVIRONMENTS.

The 2-way stretch enhances horizontal movement, ensuring freedom of motion for tasks that require lateral flexibility. Meanwhile, the 4-way stretch extends this adaptability to vertical movements, accommodating activities that demand both up-and-down and side-to-side motion. This unique combination not only promotes agility but also maximizes durability, as HEROCK® fabrics are engineered to withstand the rigors of strenuous work while maintaining their elasticity. Whether bending, reaching, or crouching, HEROCK® stretch technology ensures that your workwear moves seamlessly with you, enhancing overall performance and comfort.

NEED EXTRA LENGTH IN YOUR TROUSERS? OUR EXTENDABLE HEM OFFERS 5 CM OF ADDED FLEXIBILITY — BUILT RIGHT INTO THE GARMENT. ADJUST YOUR FIT EASILY AT HOME, WITH NO TAILOR REQUIRED. PERFECT FOR GROWING TEENS, LAYERING, OR ADDED FREEDOM OF MOVEMENT ON THE JOB.

EXTENDABLE HEM.

The Extendable Hem is a hidden feature that lets you lengthen your garment when needed. Extra fabric is folded and stitched inside the sleeve or leg, allowing up to 5 cm of extra length.

To activate it, simply unpick the visible stitch line with a seam ripper or scissors and unfold the fabric — no special tools or skills required.

Perfect for those in between sizes, or anyone who needs more coverage and flexibility. The finish remains clean and professional even after extension. If needed, the hem can be folded back and re-stitched easily.

**ADAPT YOUR GEAR.
EXTEND YOUR COMFORT.**

INSIDE VIEW

Look inside the sleeve or leg to find the folded hem. A clean row of stitches holds the extra fabric in place.

UNSTITCHING

Use small scissors or a seam ripper to carefully remove the visible stitch line along the fold. Don't cut the main seams.

UNFOLDING

Once the stitches are removed, simply unfold the fabric. You'll instantly gain 5 cm of extra length.

AFTER VIEW

The hem is now fully extended, with a seamless finish that looks and feels just like the original.

INDUSTRY

INDUSTRY

A man with a beard and safety glasses, wearing a grey industrial work jacket and black pants, is operating a machine in a factory setting. He is standing on a blue metal block, leaning forward, and using a tool to adjust the machine. The background shows industrial equipment, including a green workbench and a yellow overhead crane.

INDUSTRY

The HEROCK® Industry line was created to meet the needs of demanding users in terms of comfort, durability and easy maintenance. Designed for industrial washing and water-repellent, all products in the INDUSTRY range are available in black, anthracite and navy, with a wide size range (from XS to 4XL for tops and from 36 to 64 for bottoms). Comfortable and suitable all year round. The ideal range to equip your employees in your company's colours, as the garments are designed for customization!

MULTI NORM.

ONE OUTFIT, MULTIPLE RISKS. HEAT AND FLAME, WELDING, ELECTROSTATIC CHARGE, ELECTRIC ARC AND CHEMICAL LIQUIDS, ALL COVERED IN ONE MULTINORM WORKWEAR SOLUTION.

Some jobs don't come with a single, clearly defined risk. In one shift, the same person can face welding spatter, static discharge near flammable vapours and the splash of a chemical liquid. That is exactly where this multinorm set earns its place. Because one versatile outfit covers multiple industrial risks at once, there is less need for separate protective garments for every individual hazard. Your team gets the optimal combination of safety and practical usability, in one set that performs across very different working environments.

The certification icons are marked directly on the outside of the garments, making the protection offered by the set clear at a glance. Rather than having to look up a separate label or specification, the relevant standards are visible on the garment itself, providing a clear reference to the certified protection it offers.

COMPLETE PROTECTION IN ONE SMART PACKAGE

The jacket and trousers are designed specifically around the requirements of multinorm protective wear. That means the protection is considered not only in the materials and certifications, but in the way the garments are constructed and used on the job. Concealed zips, closed pocket openings and secure closures help prevent sparks, debris and other workplace hazards from getting where they shouldn't, while keeping the garments practical to use throughout the day.

The design also puts everyday functionality within easy reach. Multiple pockets provide dedicated space for tools and essentials, while dosimeter holder loops give teams a fixed, secure place for their equipment to monitor exposure. Press-stud closures are easy to operate - even with gloves on - and the concealed front zip adds an extra layer of protection. The trousers also feature dedicated knee pockets for the insertion of knee protectors, adding practical support for work that requires frequent kneeling.

From heat and flame to welding, electrostatic discharge, electric arc, chemical exposure, enhanced visibility and knee protection, the set is designed around multiple workplace risks. Every detail has a purpose, from the way the pockets close to the placement of the protective features. It is multinorm protection designed to work as hard and practically as the people wearing it.

MULTINORM PROTECTION DOESN'T HAVE TO FEEL STIFF. THE SATIN WEAVE GIVES IT A SMOOTH, COMFORTABLE FEEL AND A PREMIUM LOOK, WHILE THE FABRIC WEIGHT STRIKES THE RIGHT BALANCE BETWEEN PROTECTION, DURABILITY AND WEARING COMFORT.

Multinorm garments have a reputation for feeling stiff, heavy and more like armour than clothing. The satin weave changes that. It gives the jacket and trousers a smooth, pleasant feel that moves with you rather than against you, keeping you comfortable from the first hour of the shift to the last. No stiffness when you reach, bend or kneel, no fabric fighting back when the pace picks up.

The satin weave also gives the garments a clean, professional appearance. The smooth structure makes the set look premium and considered, without taking away from its purpose as protective workwear. Feeling protected and looking sharp were never meant to be a trade-off, and with this set they aren't.

At 260g/m², the fabric offers a well-balanced weight, making the set particularly well suited to long shifts and warmer working environments. It provides the substance needed for protection and durability without adding unnecessary weight, helping you stay comfortable when the temperature rises or the working day stretches on.

Protection, durability, comfort and a professional look — all in one considered construction.

MADE FOR INDUSTRIAL WASHING, MADE TO LAST.

Protective workwear only protects if it's actually worn, and it only keeps getting worn if it survives being washed as often as the job demands.

That is why this fabric is built for industrial wash processes, not just a gentle home cycle. The set is designed for professional use where clothing is washed regularly, intensively and at higher temperatures than everyday garments ever see. Frequent industrial washing puts real demands on fabrics, colours and construction, so durability through the wash cycle is essential. This set is made to go through that cycle again and again while keeping its performance intact, which supports a longer working life for the garment and a better return on every piece.

That also makes it a practical choice for professional laundries and clothing services that manage workwear for entire teams.

LAVO

20MJC2601

The HEROCK® multinorm jacket combines certified protection, comfort, and functionality with a water- and dirt-repellent surface, flame-resistant reflective tapes, contrast detailing, adjustable cuffs, extended back panel, dosimeter holder loops, and a practical multi-pocket design.

MULAN

20MTR2601

The HEROCK® multinorm trousers deliver certified protection, durability, and comfort for demanding work environments. Featuring a water- and dirt-repellent surface, flame-resistant segmented reflective tapes, elasticated waistband, raised back waistband, extendable hem, knee pockets, and a functional multi-pocket design.

MULTINORM STANDARDS

EVERY STANDARD ON THIS PAGE REPRESENTS A REAL HAZARD, TESTED AGAINST STRICT REQUIREMENTS AND BUILT INTO THE DESIGN AND CONSTRUCTION OF THE SET. THIS IS WHAT MULTINORM PROTECTION LOOKS LIKE, SPELLED OUT.

Certification labels can look like small print, but each icon in multinorm protection stands for a specific, real-world risk: heat and flame, welding and allied processes, electrostatic discharge, electric arc and limited chemical exposure. Each standard has its own test methods and its own requirements, and this set meets them all in one garment.

That combination is what makes multinorm workwear more than the sum of its parts. Real job sites rarely present one risk at a time, and a set that covers them together means your team never has to choose which hazard to dress for, or layer separate certified garments that were never designed to work as one.

ENHANCED VISIBILITY, DESIGNED TO MOVE

The set features segmented heat transfer tapes and meets EN 17353 for enhanced visibility, adding an extra layer of safety on the work floor in daylight and in low light. The key is how the tapes are integrated into the garment. Heat-transfer tapes replace traditional stitched-on reflective elements, while the segmented design allows them to flex with the fabric rather than restricting movement or adding stiffness. The result is visibility, flexibility and freedom of movement combined in one solution, keeping the wearer comfortable and unrestricted throughout the working day. It is a small detail with a real effect on how the set wears through a full shift.

EN ISO 11612: 2015

HEAT AND FLAME PROTECTION

Protection against heat and flame, designed for industrial environments where workers may face brief flame contact and exposure to radiant, convective or contact heat.

EN ISO 11611: 2015

WELDING PROTECTION

Protective workwear for welding and allied processes, engineered to resist molten metal spatter, brief flame contact and radiant heat for safer professional performance.

EN 1149-5: 2018

ELECTROSTATIC PROTECTION

Antistatic protective clothing designed to dissipate electrostatic charges and reduce the risk of ignition in potentially explosive environments, meeting the material and design requirements of EN 1149-5.

EN 61482-2: 2020

ELECTRIC ARC PROTECTION

Designed and tested to provide protection against the thermal hazards of electric arcs, meeting the requirements of the applicable electric arc protection standard for work around electrical installations.

EN 13034: 2005+A1: 2009 Type 6

LIMITED CHEMICAL PROTECTION

Protection against limited exposure to liquid chemicals, providing resistance to light spray and splashes in accordance with the requirements of the applicable chemical protection standard.

EN 17353: 2020

ENHANCED VISIBILITY

Enhanced visibility workwear for medium-risk situations, using retroreflective materials to improve wearer visibility in low-light conditions and under illumination from vehicle headlights.

EN 14404:2004 A1:2010

KNEE PROTECTION

Certified knee protection for work in kneeling positions, helping reduce pressure and impact while meeting EN 14404 performance and safety requirements.

CO-CERTIFICATION

HIGH VIZ

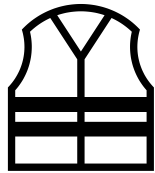

IN HIGH-RISK WORK ZONES, VISIBILITY IS CRITICAL FOR SAFETY. EN ISO 20471 CO-CERTIFIED CLOTHING OFFERS FLEXIBLE PROTECTION THAT ADAPTS TO CHANGING TASKS AND CONDITIONS. WITH HEROCK®, TEAMS STAY SAFE, COMPLIANT AND COMFORTABLE—SUPPORTED BY A SUSTAINABLE SOLUTION BUILT FOR TODAY'S DEMANDING WORK ENVIRONMENTS.

EN ISO 20471 co-certification allows workers to combine certified garments - like trousers and jackets - to reach a higher visibility class. This system offers flexibility without compromising safety. For example, Class 1 trousers combined with a Class 2 jacket can meet Class 3 standards, the highest level of visibility.

This benefits employees by increasing comfort, mobility and safety, especially in changing weather or light conditions. Workers feel more confident and focused, knowing they are protected and visible at all times.

For companies, co-certified garments show a clear commitment to safety, help meet legal standards and reduce costs by enabling layered solutions. It's a practical, future-ready approach to worker protection.

HEROCK® delivers durable, high-quality and sustainably produced workwear that meets strict certification standards. Our co-certified clothing supports performance, safety and corporate responsibility - because visibility isn't just a feature; it's a promise.

A1:2016

THE EN ISO 20471 SYMBOL SHOWS A SAFETY VEST WITH A REFLECTIVE STRIP, INDICATING THE GARMENT MEETS HIGH-VISIBILITY STANDARDS FOR USE IN HAZARDOUS AREAS WITH MOVING VEHICLES OR MACHINERY.

CLASS 1

LOWEST LEVEL OF VISIBILITY

FLUORESCENT MATERIAL
AT LEAST 0.14 M²

RETROREFLECTIVE MATERIAL
AT LEAST 0.10 M²

Designed for low-risk areas, Class 1 garments offer basic visibility. Suitable for off-road use or indoor environments like warehouses, they feature minimal reflective and fluorescent material and should not be used in traffic-exposed or high-speed zones.

CLASS 2

INTERMEDIATE PROTECTION

FLUORESCENT MATERIAL
AT LEAST 0.50M²

RETROREFLECTIVE MATERIAL
AT LEAST 0.13 M²

Class 2 provides enhanced visibility for moderate-risk environments. Commonly worn by road crews and logistics workers, these garments have more fluorescent and reflective surface than Class 1, ensuring better detection during daytime and low-light conditions.

CLASS 3

HIGHEST LEVEL OF VISIBILITY

FLUORESCENT MATERIAL
AT LEAST 0.80 M²

RETROREFLECTIVE
MATERIAL AT LEAST 0.20 M²

Class 3 offers the highest visibility and is mandatory in high-risk environments, such as highways or emergency sites. Garments must fully cover the torso and include sleeves or legs with reflective bands for maximum visibility from all directions.

FLUORESCENT & REFLECTIVE: THE SAFETY DUO

HIGH-VISIBILITY CLOTHING RELIES ON TWO KEY COMPONENTS: FLUORESCENT FABRIC AND RETROREFLECTIVE TAPE. TOGETHER, THEY ENSURE VISIBILITY IN BOTH DAYLIGHT AND LOW-LIGHT OR NIGHTTIME CONDITIONS, KEEPING WORKERS SAFE IN ALL ENVIRONMENTS.

FLUORESCENT FABRIC

Fluorescent fabric enhances visibility during daylight and in poor weather by converting UV light into visible light. It makes the wearer stand out against natural backgrounds, ideal for daytime work in outdoor or low-contrast settings.

RETROREFLECTIVE TAPE

Retroreflective tape reflects light - like headlights - directly back to its source, making the wearer visible in low-light or nighttime conditions. It's essential for workers near roads, vehicles, or machinery in dark or dimly lit environments.

UPGRADE PROTECTION BY COMBINING CERTIFIED GARMENTS

VISIBLE? CHECK. UNBREAKABLE? DOUBLE CHECK.

OUR HIGH-VISIBILITY GEAR MAKES YOU STAND OUT ON ANY JOB SITE: BOLD, TOUGH AND ALWAYS COMPLIANT. NO SHORTCUTS, NO COMPROMISES - JUST MAXIMUM SAFETY WITH THE HEROCK® ATTITUDE.

**YOU DO THE HARD WORK,
WE MAKE SURE YOU'RE SEEN.**

AND COMFORT?

We don't compromise there either. Soft durable fabrics, smart fits and full freedom of movement keep you safe, comfortable and focused through every shift. Every seam, zipper and finish is designed so you can move freely and perform at your best.

Because comfort isn't just about technology - it's about peace of mind.
Strong, safe and comfortable. That's the standard you deserve.

THE VITAL ROLE OF SAFETY FOOTWEAR IN WORK ENVIRONMENTS

SAFETY FOOTWEAR IS PART OF THE WORKER'S PERSONAL PROTECTIVE EQUIPMENT (PPE). IT IS ESSENTIAL TO WEAR IT WHEN THE ACTIVITY TO BE PERFORMED REQUIRES IT.

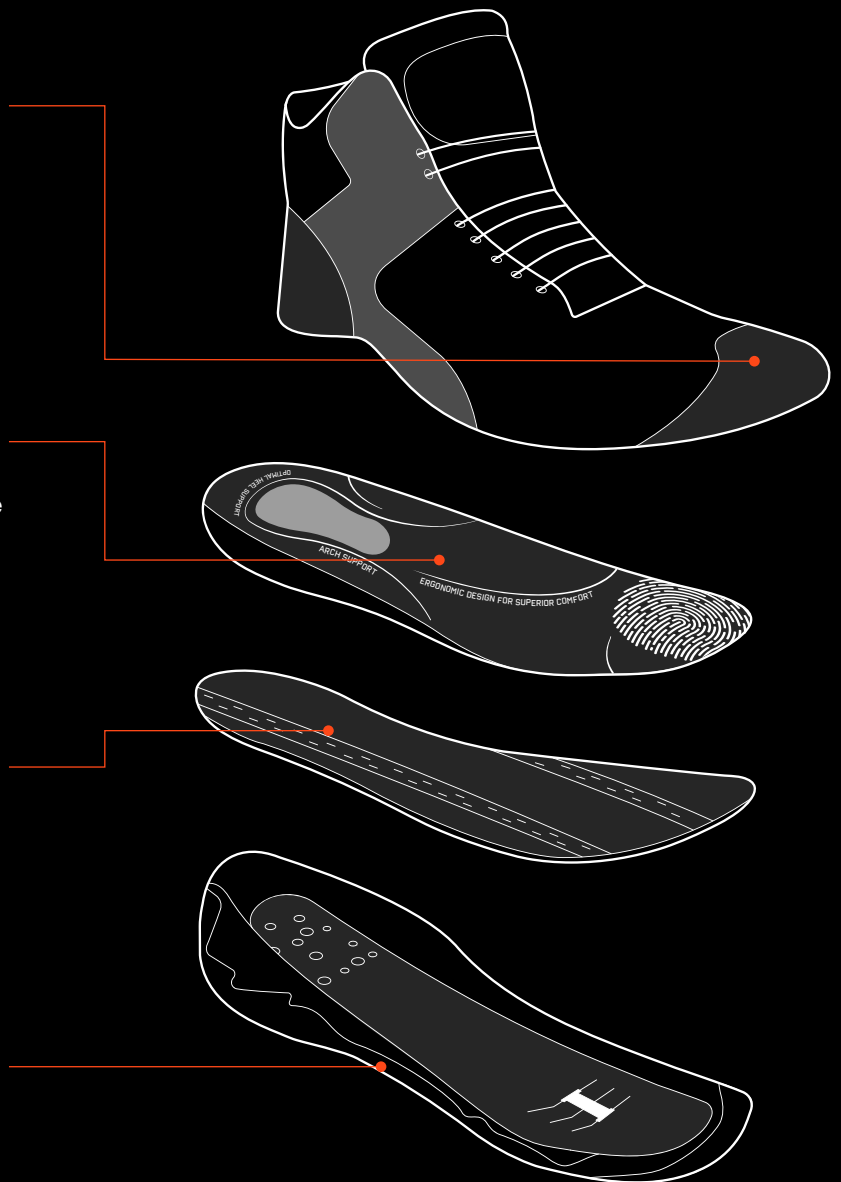

Safety is of paramount importance in the busy world of industrial and construction environments and a key aspect of this is the use of appropriate safety footwear. It plays a crucial role in protecting workers from potential hazards such as heavy objects, sharp materials or slippery surfaces. These specialized shoes are carefully constructed to provide extensive protection, not only to protect the feet from physical injury but also to improve overall comfort during long periods of wear. When you look at the components of safety shoes, you see intricate details that combine to contribute to durability, functionality and compliance with safety standards. From reinforced safety toe caps to slip-resistant soles, each component of the safety shoe serves a purpose in the well-being of those who must face challenging working environments.

4 UPPER MATERIALS/TECHNOLOGY
HEROCK® offers a diverse range of upper materials, such as leather, suede TPU and different kinds of textile technologies, securing a blend of quality and versatility. This array of materials is carefully chosen to provide the best possible quality and comfort for the working HERO.

3 HEROCK® COMFORTSTEP
Setting a new standard in ergonomic design, the HEROCK® COMFORTSTEP footbed conforms to the natural contours of the foot, providing unmatched support and cushioning. Experience a comfortable fit and enhanced foot health with the HEROCK® COMFORTSTEP footbed.

2 HEROCK® SAFESTEP
Engineered with advanced materials, the HEROCK® SAFESTEP midsole provides an outstanding protection against sharp objects and delivers durability and reliability making it an essential component for those seeking uncompromising safety.

1 OUTSOLE
The HEROCK® outsole, made from materials like PU, PU/rubber or EVA/ rubber, provides superior abrasion resistance and grip, making it an essential part of our safety shoes.

SAFETY FOOTWEAR LIMITATIONS

In case one of the safety symbols is not indicated, the shoe will not cover these risks.

All materials are prone to aging, even with the highest quality materials. Do not stock shoes longer than two years.

Unfavourable stock conditions may have a bad influence on the usage time and quality.

These conditions may influence aging:

- temperature
- humidity
- changes in material composition

FREQUENCY IN USE, WEAR AND WORKING CONDITIONS DETERMINE THE LIFESPAN

HEROCK® HYDROSHIELD

THE HEROCK® FOOTWEAR COLLECTION PROUDLY INTRODUCES TRENOS, HERON, ICARUS & VICTUS, FEATURING THE CUTTING-EDGE HEROCK® HYDROSHIELD WATERPROOF MEMBRANE.

Every single one of these models is standing out, embodying the perfect fusion of style, durability and performance. With the advanced HEROCK® Hydrosshield waterproof membrane integrated, these boots take on the elements fearlessly, keeping your feet dry and comfortable in any weather. This innovative inclusion enhances these shoes, ensuring every pair delivers the confidence to tackle diverse terrains, come rain or shine. Experience the pinnacle of footwear technology with these waterproof boots and the unbeatable waterproof protection of the HEROCK® HYDROSHIELD, setting next standards in outdoor safety footwear. Step into a world of reliability and sophistication, where each step is a testament to HEROCK®'s commitment to quality and innovation.

HEROCK® SAFESTEP

THE HEROCK® SAFESTEP ANTI-PERFORATION MIDSOLE SETS THE NEW FOOTWEAR STANDARD PER EN ISO 20345:2022, ENSURING A HIGHER LEVEL OF SAFETY.

Engineered with advanced materials, it provides outstanding protection against punctures and sharp objects. This innovative midsole guarantees peace of mind in challenging work environments, meeting the stringent requirements of the updated standard. The HEROCK® SAFESTEP midsole delivers durability and reliability, making it an essential component for those seeking uncompromising safety in their footwear. Step confidently into the future, knowing HEROCK® SAFESTEP upholds the latest industry standards, preserving security on every stride.

HEROCK® COMFORTSTEP

THE HEROCK® COMFORTSTEP ERGONOMIC FOOTBED REVOLUTIONIZES FOOTWEAR COMFORT.

Engineered with precision, it conforms to the natural contours of the foot, providing unmatched support and cushioning. Crafted for extended wear, this footbed alleviates pressure points, promoting a comfortable experience all day long. Experience a personalized fit and enhanced foot health with the HEROCK® COMFORTSTEP footbed, setting a new standard in ergonomic design. Step into the future of comfort, where every stride embraces a level of luxury and support that only HEROCK® COMFORTSTEP can deliver.

NEW FOOTWEAR STANDARD EN ISO 20345:2022

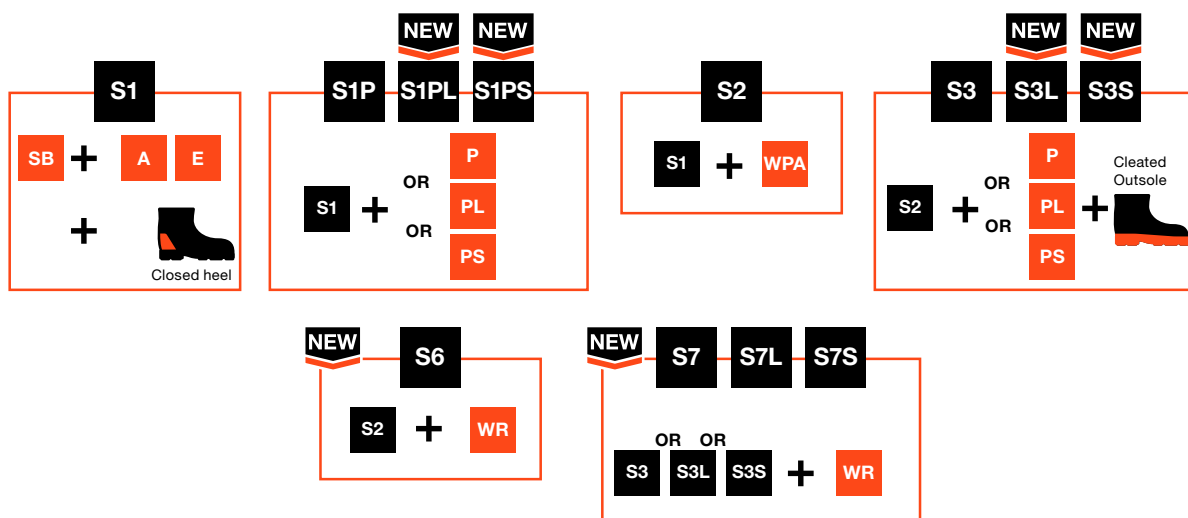

1 BASIC FUNDAMENTAL REQUIREMENTS

2 ADDITIONAL REQUIREMENTS

3 STANDARD LABELS

ANTISTATIC SHOES VS ESD - ELECTROSTATIC DISCHARGE

Antistatic safety shoes and boots, with an electrical resistance range of 0.1 to 1000 MegaOhm, serve to prevent the build-up of static charges in the human body by gradually discharging them to the ground, averting sudden electrical flows between charged objects upon contact. On the other hand, electrostatic discharge (ESD) footwear, characterized by a lower and more specific resistance range of 0.1 to 100 MegaOhm, is designed for specialized environments where protecting sensitive electronic components from potential damage due to controlled static dissipation is paramount. While both types address static electricity concerns, antistatic footwear offers general protection, whereas ESD footwear adheres to stringent standards focused on safeguarding electronic devices from electrostatic discharge in critical industries. For more information about anti-static and ESD safety footwear, please read our user instructions.

TIPS FOR FINDING THE RIGHT SHOE

ALWAYS TAKE THE TIME WHEN TRYING ON YOUR SHOES. WHEN TRYING THEM ON, MAKE CERTAIN THAT YOU CAN MOVE YOUR TOES FREELY WITHOUT HAVING YOUR FOOT FIT TOO LOOSELY IN THE SHOE. TAKE INTO ACCOUNT THAT YOUR FEET TEND TO SWELL UP SLIGHTLY DURING THE COURSE OF THE DAY, SO IT IS BEST TO TRY ON NEW SHOES DURING THE AFTERNOON. KEEP IN MIND IN WHICH CONDITIONS YOUR SHOES WILL BE USED FOR AND WHAT KIND OF WORK YOU WILL BE PRIMARILY DOING. NOT EVERY JOB REQUIRES THE SAME FOOTWEAR.

HOW MANY TYPES OF SAFETY SHOES ARE THERE?

Safety shoes low model	→	Fit for people who have to kneel regularly	The foot can easily be moved inside the shoe	Achilles tendon is less protected
Safety shoes high model	→	Fit for heavy duty work	Sufficient support and protection for the Achilles tendon	Foot is less easily moved inside the shoe
Safety boots (leather)	→	Fit for wet or humid environments	Lining is possible = fit for cold environments	Requires maintenance
Safety boots (synthetic materials)	→	Fit for wet environments and working with certain chemicals*	Cheap and require low maintenance	Less isolating against cold - sensitive to heat

*Chemicals can penetrate leather

WHEN

ADVANTAGE

DISADVANTAGE

ATTENTION POINTS WHEN PURCHASING YOUR SHOES

In this diagram, you can see which type of foot protection fits best for a specific work environment.

TYPE	WORK ENVIRONMENT				
Safety shoes low model	→				
Safety shoes high model	→				
Safety boots (leather)	→				
Safety boots (synthetic materials)	→				
		KNEELING DOWN	CLIMBING	WET ENVIRONMENT	WELDING AND SOLDERING
					WORKING WITH CHEMICALS

TIPS FOR TESTING YOUR FOOTWEAR

- Choose your shoe according to the job you need it for
- When trying on new shoes, your feet have to be able to move freely and your shoe has to fit the shape of your foot. Make sure that you can place one finger behind your foot when you move your foot all the way forward
- Take your time when picking out the right shoes and remember to try them on in the afternoon since your feet swell up during the day

TOECAPS & MIDSOLES

200 JOULE SAFETY TOECAP

APART FROM THE DIFFERENT MIDSOLES WE DISTINGUISH THREE KINDS OF SAFETY TOECAPS. THEY ALL COMPLY WITH THE EN ISO 20345 REQUIREMENTS. THE MOST IMPORTANT REQUIREMENT IS ENERGY IMPACT RESISTANCE UP TO 200 J. THE BIGGEST DIFFERENCE IN THE SAFETY TOECAPS IS THE WEIGHT.

METAL SAFETY TOECAP

Meets all requirements described under EN ISO 20345 and is also:

- Conducting both heat and cold
- Heavier compared to composite or carbon toecaps
- Detectable for metal detectors
- Best resistant to direct impact (although this situation is rather rare)

COMPOSITE SAFETY TOECAP

Meets all requirements described under EN ISO 20345 and is also:

- Light compared to the standard steel toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

CARBON SAFETY TOECAP

Meets all requirements described under EN ISO 20345 and is also:

- Ultra-light compared to the standard steel and composite toecap
- Temperature regulating (cooler in summer, warmer in winter)
- Anti-magnetic and anti-static
- Non-detectable by metal detectors

SAFETY FOOTWEAR LIMITATIONS

In case one of the safety symbols are not indicated, the shoe will not cover these risks. All materials are prone to aging, even with the highest quality materials. Do not stock shoes longer than two years. Unfavourable stock conditions may have a bad influence on the usage time and quality.

These conditions may influence aging:

- temperature
- humidity
- wear & tear
- harsh chemical exposure
- poor storage and maintenance

FREQUENCY IN USE, WEAR AND WORKING CONDITIONS DETERMINE THE LIFESPAN

CARE INSTRUCTIONS TIPS & TRICKS

- Keep your safety shoes in a dry well-ventilated dark room. We advise to use two pairs of safety shoes, allowing your gear to dry.
- Clean your shoes after use with a brush or a dry cloth. Keep them well ventilated and leave them to dry (insert a piece of newspaper if needed). Do not put your shoes in direct sunlight or close to a heat source. If there is a lot of contact with water, please use a water-resistant product and follow the instructions.
- Please avoid concrete, urine, acids, chemicals... They cause tearing of leather.
- Leather shoes need to be oiled from time to time, certainly after you have dried them, in order to prevent tear. The leather will last longer and will hold its natural elasticity. Your shoes will last longer.
- End of use? Do not throw away your shoes, but donate them or recycle. Think about a second life.

STANDARDS & CERTIFICATION

EN ISO 13688:2013+A1:2021

GENERAL REQUIREMENTS FOR PROTECTIVE CLOTHING

EN ISO 13688 is a standard that sets the basic requirements for protective workwear, ensuring that garments are safe, comfortable and suitable for use. It requires that clothing is designed with good ergonomics and fit and that the materials used are not harmful to the wearer, meaning they cannot release toxic or allergenic substances. Clothing must also keep its performance after repeated use and washing.

EN 343:2019

PROTECTION AGAINST PRECIPITATION (RAIN, SNOW, MIST AND MOISTURE)

EN 343:2019 is the European standard for protective clothing that shields the wearer against rain, snow, fog and ground moisture. It specifies requirements for both water penetration resistance and breathability (water vapor resistance) to ensure comfort and protection in wet conditions.

The standard uses a two-part classification system. Water penetration resistance (X) is rated from Class 1, the lowest level of protection, to Class 4, the highest. This is tested using the so-called "water column" method, where water pressure is applied to the fabric until it penetrates; the higher the pressure or column height the material can withstand, the more waterproof it is. Breathability or water vapor resistance (Y) is also rated from Class 1 to Class 4. This is measured by the RET value (Resistance to Evaporative Heat Transfer), which indicates how easily perspiration can pass through the fabric. A low RET value means that moisture escapes easily, providing better comfort, while a high RET value means the fabric is less breathable and can feel clammy

during activity. Importantly, the class number for Y works in the opposite way to the RET value: a low RET value corresponds to a higher class, while a high RET value corresponds to a lower class. In simple terms, the higher the number expressed in Y, the better the breathability of the garment.

EN ISO 15797:2018

RESISTANCE TO INDUSTRIAL WASHING AND DRYING

The standard specifies the test procedure for measuring the effects of industrial washing on work clothing and on its colour and durability. The clothing is tested using eight different washing procedures that simulate the influences that work clothing is exposed to during industrial washing. The clothing should be tested in a variety of ways. The preservation of the fit, wear-resistance of the seams, strength of the material, colour-fastness in relation to the colour intensity and release of colour must meet the standard.

EN ISO 20471:2013+A1:2016

HIGH VISIBILITY CLOTHING

This international standard for high-visibility clothing specifies the visibility of the user on the work floor. Everyone who works on streets, roads or building sites must wear clothing that meets the EN ISO 207471:2013 standard so the wearer is visually identifiable. The purpose of this clothing is to increase the visibility of the user both at night and during the day. Therefore, this clothing should not be covered by other outfits or have large logos printed on it that impair the reflective surface and hence the visibility. The clothing may be personalised, but this must be approved beforehand by a registered body.

You can obtain advice from your safety adviser about this. The number next to the pictogram indicates the class to which the clothing belongs, this

depends on the minimum surface area of the fluorescent and reflective material: Minimum surface with visible material m²

Class	Background material (m ²)	Reflective material (m ²)
1	0,14	0,10
2	0,50	0,13
3	0,80	0,20

The colour coordinates and the luminance factor must be within certain thresholds (before and after lighting). Requirements are also placed on the colour-fastness of both the fluorescent colours and the contrasting colours. Furthermore, the clothing should have been tested by washing at least 5 times, unless specified otherwise on the clothing. The working life of the clothing not only depends on the number of times it has been washed, but also on usage, maintenance and correct storage.

The clothing must be cared for correctly and it must be cleaned regularly. This is because the protective properties of the clothing are reduced when the clothing is dirty. The accompanying instructions describe how to care for the clothing. You can find the maximum number of times that the clothing can be washed next to the high visibility symbol. However, this only refers to the high visibility property of the clothing.

WHICH CLASS TO USE AND WHEN?

- **Class 1** offers the lowest visibility. It is suitable only for low-risk areas, such as private grounds, warehouses, or places with slow-moving vehicles where traffic speed does not exceed about 30 km/h.
- **Class 2** provides intermediate visibility. It is typically used in environments with moderate risk, such as roadworks in areas with traffic up to around 60 km/h, construction sites, or daylight outdoor work where higher visibility is needed.

- **Class 3** ensures the highest visibility. It is required for high-risk situations, including work on highways, airports, railways, or any area with fast-moving traffic over 60 km/h, poor light conditions, or night work.

EN 14058:2017+A1:2023

EN 14058:2017
+A1:2023

PROTECTION IN COOL ENVIRONMENTS

EN ISO 14058:2017 + A1:2023 is the European standard for protective clothing designed to provide comfort and protection in cool environments, where temperatures are not extreme (generally above -5°C). It applies to garments worn for outdoor or unheated indoor work where cold can cause discomfort but not severe health risks.

The standard defines performance requirements for insulation, wind resistance, breathability and water resistance. Thermal insulation indicates how well the garment retains body heat. Wind resistance shows how much wind passes through the fabric, important for maintaining warmth in windy conditions. Water penetration resistance and breathability can also be tested, though it is optional.

As with EN 343, performance is expressed in classes. For example, higher insulation values or better wind resistance correspond to higher classes, meaning better protection against cold or wind. The standard does not cover extreme cold (for that, EN 342 applies), but instead focuses on comfort and safety in moderate cold situations such as outdoor logistics, construction or warehouse work.

EN 17353:2020

EN 17353:2020

ENHANCED VISIBILITY CLOTHING

EN 17353:2020 is a European standard that sets out the requirements for enhanced visibility clothing intended for medium-risk situations. It defines how garments should be designed to improve the wearer's visibility in daylight or at night when illuminated. Unlike EN ISO 20471, which applies to high-visibility clothing for high-risk environments such as highways or airports, EN 17353 focuses on situations where visibility is important but the level of risk is lower.

The standard requires the use of fluorescent materials to increase daytime visibility and/or retroreflective materials to ensure visibility in the dark. It specifies the minimum areas of these materials, their placement on the body and their performance levels. Depending on the intended use, this standard has 3 types: type A for daytime visibility, type B for night-time visibility and type AB for combined day and night visibility. In this way, EN 17353 ensures a harmonized approach across Europe for protective equipment that enhances visibility without imposing the stricter requirements of full high-visibility PPE.

EN 14404: 2004+A1: 2010

EN 14404:2004
A1:2010

This standard describes the test methods and requirements for knee protectors for work in a kneeling position. Our HEROCK® knee pockets are certified in combination with the HEROCK® knee protectors 21MI0901 (protection type 2). Please consult the user instructions of your trousers to check the penetration level.

There are 4 types of knee protectors

1	'Independent' knee protectors, attached to the leg
2	Protectors designed to put in knee pockets on trousers
3	Loose knee protection
4	Knee protectors that are part of other protection

There are 3 penetration levels

0	Knee protectors suitable to be used on a flat surface only, offering no protection against penetration. The other requirements of EN14404 are met
1	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against penetration by objects < 1 cm
3	Knee protectors suitable for flat and non-flat floor surfaces and offering protection against extreme conditions (larger objects & impact)

WASHING INSTRUCTIONS

ALL OF OUR CLOTHING HAS BEEN DESIGNED TO OPTIMALLY ENDURE THE NATURAL ELEMENTS AND HEAVY WORKING CONDITIONS BUT EVEN THE BEST LASTING CLOTHES NEED TO BE TREATED RIGHT IF YOU WANT TO WORK IN THEM FOR A LONG TIME. THAT'S WHY YOU HAVE TO MAKE SURE THAT YOU FOLLOW THE WASHING INSTRUCTIONS ON OUR PACKAGING AND INSIDE OUR ITEMS CLOSELY. YOU CAN FIND THE MOST IMPORTANT WASHING INSTRUCTIONS HERE.

The label will give you an indication about the maximum of treatment that an item can be subjected to. The numbers give you the highest allowed temperatures in °C. If you use a limited washing program, only load up the machine halfway and make sure that you have a high liquor ratio with decreased washing and whirling motion.

WASHING	BLEACHING	PROFESSIONAL CLEANING
Max 95°C. Normal process	Any bleach allowed	Professional drycleaning in perchloroethylene, hydrocarbons
Max 95°C. Gentle process	Only oxygen / Non-chlorine bleach allowed	Professional drycleaning in perchloroethylene, hydrocarbons - Gentle process
Max 60°C. Normal process	Do not bleach	Professional drycleaning in hydrocarbons
Max 60°C. Gentle process		Professional drycleaning in hydrocarbons - Gentle process
Max 40°C. Normal process		Do not dry-clean
Max 40°C. Gentle process		Professional wet-cleaning
Max 30°C. Normal process		Professional wet-cleaning Gentle process
Max 30°C. Gentle process		Professional wet-cleaning Very gentle process
Max 30°C. Very gentle process		Do not wet-clean
Hand wash		
Do not wash		
DRYING		
	Tumble drying possible - normal temperature	
	Tumble drying possible - low temperature	
	Do not tumble dry	
IRONING		
	Maximum 200°C	
	Maximum 150°C	
	Maximum 110°C	
	Do not iron	

TIPS & TRICKS

- There is no need to wash at highest temperature when the clothing is light/mildly dirty. Washing at lower temperatures is better for your clothing and the environment. Always choose the eco-washing program.
- HEROCK® clothing is - mostly - dryer safe; we recommend however to dry your clothes on an even surface (esp. with chunky knitted articles) or line dry. Your clothing will last longer and this method is more environment friendly.
- Do not iron the prints.
- You don't wear your HEROCK® clothing any longer? Donate or recycle! Don't just throw away your clothing, think about a second life.

FITTING AND SIZES

Wearing the correct size is not only important for catwalks. Professionals need to wear garments that allow easy movement and provide them with the (working) comfort they need. A garment that does not fit could disturb movements and lead to unsafe situations. An article that does not fit

well is more prone to wear and will have to be replaced quicker. That is why HEROCK® focuses on a perfect fit workwear collection. The pockets and other functions of our clothing are easily reachable and accessible. That may seem a detail, but it can be a big difference in the workplace.

A perfect fit is key when it comes to free and easy movement. We offer each article of our collection in every possible size. Check your measurements on the following pages and choose a size that fits best for your physique and height.

FABRICS & TREATMENT

HEROCK® MAKES USE OF THE BEST TECHNOLOGIES THAT ARE AVAILABLE TO US. THAT WAY WE CAN GUARANTEE AN OPTIMAL PROTECTION AND AN UNMATCHED CONVENIENCE WHILE DOING YOUR JOB. HERE YOU WILL FIND MORE DETAILS ON OUR MOST FREQUENTLY USED FABRICS AND TECHNOLOGIES SO YOU KNOW EXACTLY WHAT YOU ARE PURCHASING.

CORDURA®

Cordura® is a fabric that was designed by textile manufacturer Dupont. This fiber is extremely durable and strong, but very flexible at the same time. HEROCK® makes use of this extraordinary fabric to fortify crucial points in its clothing, for example on the knees, shoulders and elbows.

COOLMAX®

The Coolmax® fiber which is incorporated into the fabric, allows you to keep your body dry and cool: the specially designed fiber will pass your transpiration moisture to the layer above where it can evaporate. This fabric is even worn by professional athletes because of its unique ventilating abilities.

THERMOLITE®

The Thermolite® fiber technology delivers lightweight warmth, it traps a layer of warm air between the fabric and your skin. It is engineered to help and optimize your performance without weighing you down.

FLEXFIT®

Our Flexfit® caps are fitted with a patented technology that weaves polyurethane Spandex into the sweatband and throughout the entire crown, providing a superbly comfortable fit.

YKK®

YKK® zippers are designed by the YKK® Fastening Products Group. They are the strongest zippers in the world. We use them to add even more strength to the HEROCK® workwear.

meryl®

The ideal basis layer for the three layer system and perfectly sweat-proof. The quick-dry characteristics allow maximum comfort and keep your body warm.

FLEX 2000

This is an extra strong polyester fabric that is fortified with polyurethane, a PVC-coating and taped seams. This combination provides 100% waterproofness, making it the ideal fabric for working in the rain.

PRO-REFORCE

Pro-Reforce is an innovative material that we designed to function as a protective shield. The fabric is made out of a 100% Oxford polyester material with an additional coating that does not only make your clothing dirt-repellent, but also provides extra mechanical resistance. This extremely robust and durable fabric will protect you against any possible external factor and allow you to work in all possible conditions, whether you're dealing with extreme weather or working conditions. Some items are completely manufactured using this fabric, others are fortified with Pro-Reforce in crucial points.

WASA SWEDEN

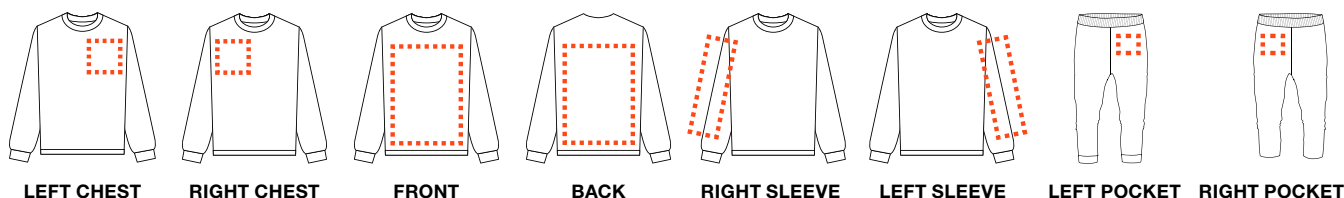

WASA SWEDEN QUALITY specializes in durable accessories. They use a high percentage of copper mixed with zinc, which makes their fasteners more solid, more easily workable and more securely attached in our clothing. As a result, our HEROCK® products become more durable.

DECLARATION OF CONFORMITY

We guarantee that we always use the same production methods for our standardized clothing and shoes and that we always use the same materials/fabrics that were tested to reach the standardization; Upon request we can deliver all the CE-certificates. You can turn to the website for the declarations of conformity for standardized/certified clothing and shoes.

www.herockworkwear.com/conformity/ce.html

PERFECTLY SUITED FOR PERSONALISATION.

All items in our collection can be customised to the individual needs of the end customer, whether it is a large company with many employees or a one-man business employing just a few experts. Anyone can put together a personalised outfit that clearly displays the company's logo or have a collection of personalised workwear designed. After all, a true professional is proud of his work and may therefore sign that work with his name or the name of his company. Contact your local HEROCK® dealer for more details on personalising our items and the techniques available for this: printing, embroidery, different colour accents, etc.

MAKE YOUR HEROCK® APPAREL UNIQUE.
